NDOR PQS Review

Date

Archeological APE
APE consists of all construction areas described in the project description related to the replacement of SS21C00286, approximately 550 feet west of the center of the bridge and 750 feet east of the center of the bridge. The APE extends approximately 175 feet from the edge of existing ROW north and south. The depth of the APE is no more than 15' below current grade, the maximum anticipated depth of ground disturbance at stream crossings.
Above Ground Resources APE
The APE consists of all construction areas described in the project description related to the replacement of SS21C00286, and includes an area 100 feet beyond the existing right-of-way to account for any possible visual or atmospheric effects to structural and architectural resources.
