FOR IMMEDIATE RELEASE

Work to Begin on N-12 East & West of Bristow

Weather permitting, construction work is scheduled to begin the week of August 17 on N-12, beginning at the N-12/US-281 intersection east of Spencer and extending 9.4 miles to Lynch, according to the Nebraska Department of Roads.

Werner Construction Co. of Hastings, Nebraska, has the \$2,507,542 contract for milling the existing asphalt surfacing and placing a four-inch asphaltic concrete overlay. Additionally, guardrail will be removed at several locations and roadway foreslopes will be constructed. Erosion control measures will include the placement of rock riprap at several drainage structures.

Traffic will be maintained during construction with the use of flaggers and a pilot car. Load widths greater than 11 feet will not be permitted through the project. The anticipated completion date is early November.

The Department of Roads' project engineer is H. Gene Colfack of O'Neill. Motorists are urged to use caution while driving through highway work zones and to remember that speeding fines are doubled when workers are present.
