

## **Innovation Task Force**

### **What is the Innovation Task Force?**

NDOR is forming the Innovation Task Force to bring some of the best minds in Nebraska together to provide input into NDOR's business practices with the ultimate goal of maximizing transportation's value to the Nebraska economy by delivering projects and services as quickly and efficiently as possible.

The multi-disciplined Innovation Task Force will explore the use of economic impacts when selecting projects along with identifying innovative funding, finance and project delivery opportunities.

### **Why is the Task Force being convened?**

As we explore less familiar areas, such as the economic impacts of our transportation investments and innovative finance and project delivery, we need to look at these issues from all sides before we can decide which ones make the most sense here in Nebraska. Our partners can help us to do that.

### **When will the Task Force meet?**

An initial meeting of the task force is scheduled for November 2015. It is anticipated that subsequent meetings will be held quarterly.

### **Who will be on the Task Force?**

Members will be representatives of many interests from across Nebraska, including federal, state, county and city governments, contractors, engineering consultants, agriculture, trucking and other industries, and the University of Nebraska.
