FOR IMMEDIATE RELEASE

## Maintenance Work to Begin on N-68 Ravenna Viaduct

Weather permitting, bridge maintenance work is scheduled to begin April 22 on the N-68 viaduct over the Burlington Northern and Santa Fe Railway just south of Ravenna, according to the Nebraska Department of Roads.

Iowa Erosion Control, Inc., of Victor, Iowa, has the \$44,231 contract to remove moisture from suspension tie-rod housings in the deck, and to add additional weatherproofing to ensure they remain moisture free.

During construction, traffic will be shifted away from the suspension structures on either side of the bridge, but will utilize the center lane over the bridge to maintain uninterrupted northbound and southbound traffic. Work is anticipated to be completed in two to four weeks.

The Department of Roads' manager for this project is Eric Klein of Grand Island. Motorists are reminded to drive cautiously through construction zones.
