

PROJECT PROFILE:  
**US 77 from Wahoo to Fremont**

**QUICK FACTS**

**Category:** Design

**Project:** US 77 Wahoo to Fremont,  
4-lane divided expressway

**Estimated project cost:** \$68M

**Length of project:** 16 miles

**WHY IT WAS SELECTED**

**Completes a Gap in the Expressway System:** This 16-mile four-lane expansion, which spans from Wahoo to Fremont, will fill a gap and make progress toward completing the Expressway System. NDOR will begin design work now so that this project will be ready for future construction.

**Builds on Previous Investments:** This project helps deliver on the 1988 commitment Nebraska made to expand its Expressway System. Significant investment has already been made along the US 77 corridor and this project is an important step toward the eventual completion of the Expressway System. This project will also help support some of the traffic utilizing NE-109.

**Supports Continued Growth:** Since 2009, Fremont and Lincoln have experienced steady population growth. This eventual completion of US 77 as a four-lane expressway will support continued development in these communities and others along the corridor. Currently, more than 5,900 vehicles travel this 16-mile stretch each day.
