## **Communications and Public Involvement Plan**

---

# Lincoln South Beltway Communications and Public Involvement Plan

## **Purpose, Objectives. and Emphasis of the Plan**

The purpose of this Public Involvement Plan (PIP) is to describe the intent and scope of the public involvement effort to be implemented for the Lincoln South Beltway. The objectives of the communications and public participation effort for the project are to: efficiently and effectively obtain useful input from a broad, inclusive, and representative set of informed community members. The emphasis of the PIP is to engage stakeholders with interests in corridor improvements. The plan is designed in compliance with NDOR's current public involvement plan and other applicable requirements. This plan is customized for the Lincoln South Beltway project.

## **Opportunities for Public Input**

Opportunities to provide input will include:

- 1) Direct feedback during one public meeting
- 2) One Advisory Panel meeting
- 3) Online feedback via the project website
- 4) Hardcopy feedback via formal project comment forms, letters and notes sent to the project team

All input will be compiled and be presented and/or summarized.

## **Public Communications**

Public communications will be developed in a collaborative and interdisciplinary process to make sure the messages are appropriate for the public and accurate from a technical perspective. Two Project newsletters will match formats for Fact Sheets used by NDOR, with added graphics. NDOR will review the draft newsletters. Logos representing Federal Highway Administration, Nebraska Department of Roads, City of Lincoln and Lancaster County will appear on project materials. No consultant logos will appear. The first newsletter will be used as a handout at the public meeting. NDOR will mail a postcard invitation to the public meeting. Additionally, NDOR will mail the second project newsletter to the project mailing list at the conclusion of Phase I.

NDOR will update the project website with postcard and newsletter content. Should the team find that minority and low-income persons may be affected, project information will be produced in multi-lingual formats and will be distributed directly to any affected persons in accordance with Environmental Justice principles. Chris Hassler with the Civil Rights Office will assist the team with outreach to minority populations. While minorities may not be directly affected, the team will seek input that is inclusive. All tools for public communication will use common messages, text, graphics and maps to unify and streamline project communications.

Newsletters will describe the project and provide information about:

- NEPA process
- Schedule
- Project Background
- Purpose and Need Overview
- Frequently Asked Questions
- Opportunities for Public Involvement

## **Public Relations**

The implications of any legislation that affects the Build Nebraska Act, will be monitored by NDOR's government affairs team as this is one of the funding mechanisms associated with the Lincoln South Beltway Project. It will be important to monitor legislative happenings and testimony throughout the life of the project. Public relations efforts will include providing information to local media, developing a standard presentation for NDOR and others to use if requested to speak on the project, and standardized talking points to use when responding to public comment. If enough interest exists, a formal Speakers Bureau could be implemented to provide standardized project information to community and civic groups throughout Lincoln.

## **Advisory Panel**

The Advisory Panel will be comprised of community leaders and elected officials. An effort will be made to include those with strong community connections and involvement so that they can act as project ambassadors, distribute project information and gather community input. This panel will be convened for one meeting during this phase, to occur prior to the public meeting. Additional meetings will occur in Phase 2 of the project. NDOR will coordinate the invitation to individuals and groups that have been identified to serve as part of this panel.

Groups that have been identified for representation and involvement include:

Mayor's Office (City of Lincoln)  
Lancaster County Board  
Lincoln City Council  
Lincoln Chamber of Commerce

Trucking Association  
Private Industry (trucking)  
District 1 Highway Commissioner  
Project Steering Committee

## **Public Meetings**

One public meeting will be held in the South Lincoln area. NDOR will schedule the public meeting, advertise the meeting, reserve the meeting room location, document the meeting location satisfies ADA requirements, and provide translators and translated materials if needed. No consultant logos will appear on public meeting materials. A meeting summary will be completed following the meeting and will be made available via the project website.

## **Website**

Website materials will be made available to NDOR in June 2013. This will include basic information such as project goals and objectives, key participants, corridor details, an overall process summary and the schedule. The website materials will also clarify how and when the public can participate. The project team will provide website content to NDOR to add to the existing NDOR website. Website updates will occur when the public meeting is announced and as the project newsletters are released.

## **Comment Compilation**

All comments will be compiled and analyzed. Website use statistics and available information on document downloads will also be compiled on a monthly basis by the NDOR Web Communication Office. The public involvement team will coordinate with the project team to make sure substantive comments are addressed and will prepare summaries of public input throughout the course of the project.

## **Deliverables**

The primary deliverables and activities of the PIP include:

- Communications and Correspondence
- Project Presentations and Displays
- Project Documents
- One Public Information Meeting and Summary
- One Advisory Panel Meeting and Summary
- Two Project Newsletters (NDOR Fact Sheet Format)
- Project Website Content
- Comment Compilation, Analysis, response facilitation
- Power Point for NDOR staff and others to use for community presentations

## **Schedule**

- PIP plan finalized March 2013
- Website Content June 2013
- Advisory Panel to be convened prior to the first public meeting May 2013
- Tentative Public Meeting to be held in June 2013
- Newsletter #1 to coincide with the public meeting
- Newsletter #2 to coincide with the end of Phase I

## **NEBRASKA DEPARTMENT OF ROADS NOTICE OF HIGHWAY PUBLIC MEETING**

**4:00 – 7:00 PM; Tues., June 25, 2013**

***Project Development Open House Public Workshop***

**Lincoln Southwest High School, 7001 S. 14th St., Lincoln, NE**

### ***DPU-LIN-2-6(120) Lincoln South Beltway; CN 12578D***

The Federal Highway Administration (FHWA), Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County will hold a public open house regarding the development of the south beltway project, south of the city of Lincoln, Lancaster County. The meeting will be held at the Lincoln Southwest High School, 7001 S. 14th St., Lincoln, NE, Tuesday, June 25, 2013, 4:00-7:00 P.M.

Identified as *Lincoln South Beltway*, the proposed project would begin on N-2 at 148<sup>th</sup> Street, diverges at the intersection of South 120th Street, and runs south of Saltillo Road west to U.S. Highway 77 (US-77) between Saltillo Road and Bennet Road. This new four-lane divided roadway would be part of a beltway system encompassing Lincoln.

Originally conceived in the 1970s, the Lincoln Beltway System concept has undergone a number of variations. An Environmental Impact Statement for both the south and east beltway systems was approved in 2002 with the City of Lincoln as the lead agency. NDOR project development refinements progressed until 2006 on the south beltway when the development was placed on hold. The south beltway project was shelved in 2008 due to lack of a foreseeable funding source.

The NDOR has now been provided state funding which, coupled with federal and local assistance, makes development, design, and construction possible. A design consultant has been hired and an Environmental Assessment (EA) study and preliminary engineering is currently underway. Funding will be available through the Build Nebraska Act as early as fiscal year 2020. The construction would take several years to complete.

The proposed project would require the purchase of new property rights. The existing N-2 roadway will be relinquished to Lancaster County and the City of Lincoln at the completion of beltway construction.

The public meeting is being held to gather information and comments regarding the proposed project, currently in the development phase. All interested persons are invited to attend and present relevant input. Personnel from NDOR and

their consultants will be present to gather remarks and questions. The “open house” workshop format allows the public to come, gather pertinent information, speak one-on-one with project personnel, and leave as they wish.

---

NDOR will make every reasonable accommodation to provide an accessible meeting facility for all persons. Appropriate provisions for the hearing and visually challenged or persons with Limited English Proficiency (LEP) will be made if the Department is notified by June 14, 2013. Written materials will be available in English, Spanish, Arabic, and Vietnamese in compliance with state and federal regulations; interpreters in those languages will be available at the meeting. Notification should be submitted to: Greg Weinert, Public Hearings Officer, Nebraska Department of Roads, P.O. Box 94759, Lincoln, NE 68509-4759; [greg.weinert@nebraska.gov](mailto:greg.weinert@nebraska.gov); voice telephone (402) 479-4871, TDD telephone (402) 479-3834, Fax (402) 479-3989.

Information regarding the proposed project will be available after the meeting on the NDOR website at [www.transportation.nebraska.gov/projects/](http://www.transportation.nebraska.gov/projects/) by clicking on the “Lincoln South Beltway” link. For further information, contact Tom Goodbarn, NDOR District One Engineer, (402) 471-0850, [thomas.goodbarn@nebraska.gov](mailto:thomas.goodbarn@nebraska.gov).

# Public meeting on South Beltway slated for June 25

JUNE 03, 2013 4:05 AM • BY JORDAN PASCALE / LINCOLN JOURNAL STAR

In one of the first steps to restarting the South Beltway project, officials will host an informal open house to educate residents about their plans.

The public meeting will be 4-7 p.m. June 25 at Lincoln Southwest High School.

Officials from the Nebraska Department of Roads, the Federal Highway Administration, the City of Lincoln and Lancaster County will be on hand to answer questions and present initial plans.

Stations will be set up to discuss the project design, timeline, the purpose and overview of the project, traffic patterns, right-of-way acquisition, multi-modal options like accompanying bike lanes, environmental impact and the next steps.

Rodney P. Vandenberg, Southeast Nebraska's highway commissioner, said the meetings are also about listening to residents and gathering comments.

## AVISO DE REUNION PÚBLICA DEL PROYECTO DE AUTOPISTA

### Martes, 25 de junio del 2013; 4:00 – 7:00PM

Taller Abierta al Público Sobre El Desarrollo De Proyecto  
Escuela Secundaria Suroeste

(Lincoln Southwest High School) 7001 S. 14th St., Lincoln, NE

DPU-LIN-2-6(120); CN 12578D

## Circunvalación Sur de Lincoln

El propósito del taller abierto al público es volver a presentar este proyecto a la ciudadanía. El proyecto fue archivado en 2008 debido a la falta de una fuente previsible de financiación. Desde entonces hasta el día de hoy, El Departamento de Carreteras de Nebraska (NDOR) ha sido provisto de fondos estatales el cual adjuntado con asistencia federal y local, hace posible el desarrollo, diseño y construcción de la carretera de Circunvalación Sur de Lincoln. El deseno preliminar de Ingeniería está en proceso. El estudio de Evaluación Ambiental (EA) está en proceso de revisión de los resultados de los Impactos Ambientales Determinados (EIS) en el 2002. Sugerencias y comentarios del público están siendo tomados en cuenta.

NDOR hará todo lo razonablemente posible para proporcionar un centro de reunión accesible. Materiales de información elaborados serán presentados en inglés, español, árabe y vietnamés en conformidad con las regulaciones estatales y federales; en la reunión se contara con la presencia de intérpretes en los idiomas mencionados anteriormente. Para personas quienes sufren limitaciones audios-visuales o personas con limitada proficiencia del inglés (LEP) se proporcionaran las adecuadas provisiones a solicitud al NDOR antes de 17 de junio del 2013. Para notificar o comentar enviar a: Participación Pública, NDOR, P.O. Box 94759, Lincoln, NE 68509-4759; [greg.weinert@nebraska.gov](mailto:greg.weinert@nebraska.gov); 402-479-4871, TDD 402-479-3834, Fax 402-479-3989. Información sobre el proyecto propuesto se actualiza periódicamente en el sitio web del NDOR: [www.roads.ne.gov/projects/south-beltway/](http://www.roads.ne.gov/projects/south-beltway/).

Sugerencias y comentarios del público están siendo tomados en cuenta.

NDOR hará todo lo razonablemente posible para proporcionar un centro de reunión accesible. Materiales de información elaborados serán presentados en inglés, español, árabe y vietnamés en conformidad con las regulaciones estatales y federales; en la reunión se contara con la presencia de intérpretes en los idiomas mencionados anteriormente. Para personas quienes sufren limitaciones audios-visuales o personas con limitada proficiencia del inglés (LEP) se proporcionaran las adecuadas provisiones a solicitud al NDOR antes de 17 de junio del 2013. Para notificar o comentar enviar a: Participación Pública, NDOR, P.O. Box 94759, Lincoln, NE 68509-4759; [greg.weinert@nebraska.gov](mailto:greg.weinert@nebraska.gov); 402-479-4871, TDD 402-479-3834, Fax 402-479-3989. Información sobre el proyecto propuesto se actualiza periódicamente en el sitio web del NDOR: [www.roads.ne.gov/projects/south-beltway/](http://www.roads.ne.gov/projects/south-beltway/).

## AVISO DE REUNION PÚBLICA DEL PROYECTO DE AUTOPISTA

### Martes, 25 de junio del 2013; 4:00 – 7:00PM

Taller Abierta al Público Sobre El Desarrollo De Proyecto  
Escuela Secundaria Suroeste

(Lincoln Southwest High School) 7001 S. 14th St., Lincoln, NE

DPU-LIN-2-6(120); CN 12578D

## Circunvalación Sur de Lincoln

El propósito del taller abierto al público es volver a presentar este proyecto a la ciudadanía. El proyecto fue archivado en 2008 debido a la falta de una fuente previsible de financiación. Desde entonces hasta el día de hoy, El Departamento de Carreteras de Nebraska (NDOR) ha sido provisto de fondos estatales el cual adjuntado con asistencia federal y local, hace posible el desarrollo, diseño y construcción de la carretera de Circunvalación Sur de Lincoln. El deseno preliminar de Ingeniería está en proceso. El estudio de Evaluación Ambiental (EA) está en proceso de revisión de los resultados de los Impactos Ambientales Determinados (EIS) en el 2002. Sugerencias y comentarios del público están siendo tomados en cuenta.

# PROJECT DEVELOPMENT WORKSHOP PUBLIC OPEN HOUSE MEETING

Lincoln Southwest High School, 7001 South 14th St., Lincoln, Nebraska  
Tuesday, June 25, 2013; 4:00–7:00 PM

## Project DPU-LIN-2-6(120); Control Number 12578D **LINCOLN SOUTH BELTWAY**

**LOCATION:** This proposed project is located in Lancaster County south of the City of Lincoln. It would begin on Nebraska Highway 2 (N-2) at South 148<sup>th</sup> Street, diverge at the intersection of South 120<sup>th</sup> Street, and run south of Saltillo Road, proceeding west to U.S. Highway 77 (US-77) between Saltillo Road and Bennet Road.

**PURPOSE AND NEED:** The 2002 Environmental Impact Statement (EIS) and other previous studies identified the purpose and need for the south and the east beltways around Lincoln. The project sponsors are currently updating traffic and other analyses originally used to support the needs and benefits of the South Beltway project and validate it as a stand-alone project. The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The project is needed because:

- Regional population and traffic growth has increased demands on Lincoln’s transportation network.
- Interstate traffic traveling between I-29 and I-80 often pass through Lincoln on an urban arterial street (N-2), stopping at numerous traffic lights and conflicting with local traffic.
- Trucks (and other traffic passing through but not stopping in Lincoln) share routes with local traffic, which creates mobility and vehicle conflicts between regional/interstate and local trips.

### TRAFFIC VOLUMES: Nebraska Highway 2 (N-2)

Year (Projections from 2002 EIS; new studies are in progress)	2012 (Existing Urban N-2)	2030 (New Beltway)
Vehicles Per Day (ADT)	<b>15,800</b>	<b>20,500</b>
% Heavy Trucks	<b>22%</b>	<b>24%</b>

**SCOPE OF WORK:** This project would create a new four-lane divided roadway. Interchanges are proposed at: US-77, Saltillo Road, 27<sup>th</sup> Street, 68<sup>th</sup> Street, 84<sup>th</sup> Street, and 120<sup>th</sup> Street. Overpass Structures are proposed at: 25<sup>th</sup> Street, the Homestead Trail, the BNSF Railroad, 54<sup>th</sup> Street, Saltillo Road (East of 98<sup>th</sup> Street), the OPPD Rail Spur, and 134<sup>th</sup> Street. The roadway engineering would be to Expressway standards.

**ESTIMATED CONSTRUCTION SCHEDULE:** Construction is tentatively scheduled to begin as early as spring of 2020 and could be completed in five to seven years.

**PROPOSED ACCOMMODATION OF TRAFFIC:** The proposed new roadway construction would be completed without detouring N-2 or US-77 traffic. Lane closures with appropriate traffic control may cause delays in the construction area.

**RIGHT-OF-WAY:** Permanent property right acquisitions for right-of-way (ROW) are projected at about 730 acres. One commercial and three residential relocations are possible. Temporary easements (TE) and Control of Access (CA) rights would be necessary through the project area. ROW activities are scheduled to begin in 2016-2017.

**POTENTIAL IMPACTS:** **Relinquishments:** The existing N-2 roadway between approximately 120<sup>th</sup> Street and US-77 would be relinquished to Lancaster County and the City of Lincoln at the completion of the beltway construction by a previously signed agreement. **Environmental:** Impacts were previously considered and are being reevaluated; permanent wetland impacts are anticipated and would be mitigated locally or at a regional wetlands bank. **Socio-Economic:** Impacts are similarly being reevaluated.

**ESTIMATED COST:** The estimated cost of the entire project is approximately \$200 million and would come from federal, state, and local funding. The primary funding would derive from Build Nebraska Act funds. The city of Lincoln would participate with a 20% cost share.

**HISTORY:** Originally conceived in the 1970s, the Lincoln Beltway System concept has undergone a number of variations. An EIS for the south and east beltway system concepts was approved in 2002 with the City of Lincoln as the lead agency. NDOR project refinements progressed on the south portion of the beltway until 2006 when the development was placed on hold. The project was shelved in 2008 due to lack of a foreseeable funding source. The NDOR has now been provided state funding which, coupled with federal and local assistance, makes development, design, and construction of the Lincoln South Beltway possible. A design consultant has been hired and preliminary engineering is currently underway. Additionally an Environmental Assessment (EA) study has been initiated to reassess and compare the impacts of the South Beltway as a standalone project. It will consider the design and environmental condition changes that have occurred since the EIS was approved. Public input is vital in this stage of project development.

لينكولن جنوب غرب هاي سكول، 7001 جنوب شارع 14، لينكولن، نبراسكا  
الثلاثاء، 25 يونيو، 2013؛ 4:00 حتي 19:00

## (D)؛ رقم التحكم 12012578 DPU-LIN-2-6 مشروع لينكولن جنوب بالتوي

**الموقع:** يقع هذا المشروع المقترح في مقاطعة لانكستر جنوب مدينة لينكولن. سيبدأ هذا المشروع في نبراسكا على الطريق السريع في جنوب شارع 148 ليتباعد عند تقاطع جنوب شارع 120 و يتواصل جنوب طريق سالتيو و يمتد غرباً على الطريق السريع (US-77) بين طريق سالتيو و طريق بانات .

**الهدف و الحاجة:** حدد بيان التأثير البيئي (EIS) لسنة 2002 و غيرها من الدراسات السابقة الهدف و الحاجة لجنوب و شرق الطريق السريع الموجود حول لينكولن. يقوم حالياً رعاة المشروع بتعيين تقارير حركة المرور و غيرها من التحاليل التي يتم استعمالها لدعم احتياجات و منافع مشروع جنوب بالتوي و أيضاً التثبت من صحة هذا المشروع كمشروع مستقل. و الغرض من مشروع لينكولن جنوب بتلواي هو تحسين شبكة النقل المحلية و الإقليمية و ذلك بالحد من التضارب بين الرحلات غير المتجهة نحو لينكولن و الرحلات المحلية داخل المدينة، و بتحسين مدى التواصل بين الجهتين الجنوبية و الغربية و ضمان رحلات امنة للركاب و كذلك رحلات الشحن المارة من المدينة.  
إن هذا المشروع ذو أهمية بسبب:

- \* إزدياد الطلب على شبكة النقل بلينكولن بسبب نمو عدد السكان بالجهة و حركة المرور.
- \* حركة السفر بين الطريق السريع I-29 و I-80 غالباً ما تمر عن طريق لينكولن على الشارع الحضري (N-2) و هو ما يسبب التوقف عند العديد من إشارات المرور و التعارض مع حركة المرور المحلية.
- \* تتقاسم الشاحنات (و سيارات أخرى مارة عن طريق لينكولن بدون توقف) الطريق و المسارات مع السيارات التابعة لحركة المرور المحلية مما يخلق تضارب بين الرحلات الإقليمية و المحلية.

### حجم الأشغال: الطريق السريع نبراسكا 2

السنة (التوقعات من EIS سنة 2002 ،	عام 2012 (الحالي، N-2)	عام 2030 (بالتوي)
المركبات لكل يوم	15,800	20,500
الشاحنات الثقيلة %	22%	24%

**نطاق العمل:** من شأن هذا المشروع إنشاء طريق مقسم إلى أربعة ممرات. تم إقتراح التقاطعات في :  
US-77، شارع سالتيو، شارع 27، شارع 68، شارع 84، و شارع 120. و تم إقتراح هياكل الجسر في: شارع 25، هو مستيد ترايل،

سكك الحديد BNSF، شارع 54، شارع سالتيو (شرق شارع 98)، مهماز السكك الحديدية OPPD، و شارع 134. و ستتم هندسة الطرق بإتباع معايير الطريق السريع .

# TALLER DE DESARROLLO DEL PROYECTO SESION ABIERTA AL PÚBLICO

Lincoln Southwest High School 7001 South 14th St. Lincoln, Nebraska

Martes, 25 de Junio del 2013; 4:00-7:00pm

## Proyecto DPU-LIN-2-6(120); Numero de Control 12578D

# LINCOLN SOUTH BELTWAY

(Circunvalación Sur de Lincoln)

**UBICACION:** Este proyecto propuesto se encuentra localizado en el Condado de Lancaster, al sur de la ciudad de Lincoln. Comenzaría en la Autopista Nebraska 2 (N-2) en la Calle 148 Sur (South 148th Street), divergiendo en la intersección de la Calle 120 Sur (South 120th Street) y continuar al sur de la Carretera de Saltillo (Saltillo Road), procediendo hacia el oeste hasta la Autopista U.S. 77 (US-77) entre Saltillo Road y la Carretera de Bennet (Bennet Road).

**PROPÓSITO Y NECESIDAD:** La Declaración de Impacto Ambiental (EIS) del 2002 y otros estudios previos identificaron el propósito y la necesidad de la circunvalación en el lado Sur y Este alrededor de Lincoln. Los patrocinadores del proyecto están actualizando los análisis del tráfico y otros estudios utilizados originalmente para apoyar las necesidades y beneficios del proyecto de carretera de la Circunvalación Sur además de validarlo como un proyecto independiente. El propósito de este proyecto de Circunvalación Sur de Lincoln es mejorar la función de la red del sistema de transporte local y regional mediante la reducción de conflictos entre viajes no destinados a Lincoln y viajes locales en la ciudad, además de mejorar la conectividad de Este-Oeste para viajeros de paso y de carga pesada a través de la ciudad. El proyecto es necesario porque:

- El crecimiento de la población regional y el tráfico incrementaron las exigencias en la red de transporte de Lincoln.
- El tráfico de la Interestatal entre las I-29 y I-80 frecuentemente pasa por Lincoln a través de una vía arterial urbana (N-2), deteniéndose en un sinnúmero de semáforos creando conflictos con el tráfico local.
- Camiones (y otros tipos de tráfico de paso sin parada en Lincoln) comparten rutas con el tráfico local el cual crea conflictos de movilidad vehicular entre viajes locales, regional/interestatal.

### VOLUMEN DE TRÁFICO: N-2

Año ( Las proyecciones de 2002 EIS; nuevos estudios están en curso)	2012 (N-2 Urbana Existente)	2030 (Circunvalación Nueva)
Vehículos Por Día (ADT)	15,800	20,500
% Transporte Pesado	22%	24%

**ALCANCE DEL TRABAJO:** El proyecto crearía una nueva carretera dividida de cuatro carriles. Los intercambios propuestos son en la: US-77, Saltillo Road, 27th Street, 68th Street, 37th Street y 120th Street. Las estructuras de puentes propuestos son en la: 25th Street, Homestead Trail, la vía ferroviaria de BNSF, 54th Street, Saltillo Road (Este de la calle 98th Street), espuela ferroviaria de OPPD y 134th Street. En el diseño de ingeniería de la carretera se utilizará estándares de diseño de autopistas.

**CRONOGRAMA ESTIMADO DE CONSTRUCCION:** La construcción está tentativamente programado para empezar a inicios de la primavera del 2020 y podría ser concluido en un periodo de cinco a siete años.

**ACOMODACION DE TRAFICO PROPUESTO:** La construcción propuesta de la nueva carretera sería completada sin desvío de tráfico en la N-2 o la US-77. Cierre de carriles con control de tráfico adecuado podrían causar retrasos en el área de la construcción.

**DERECHO DE VIA:** Se anticipa la adquisición de derechos de propiedad permanente para derecho de vía (ROW) proyectándose en una cantidad de 730 acres aproximadamente. Se prevén reubicaciones de una propiedad comercial y dos propiedades residenciales. Servidumbres temporales (TE) y Control de Accesos Privados (CA) serían necesarios en el área correspondiente al proyecto. Actividades de ROW están programados para empezar en el 2016-2017.

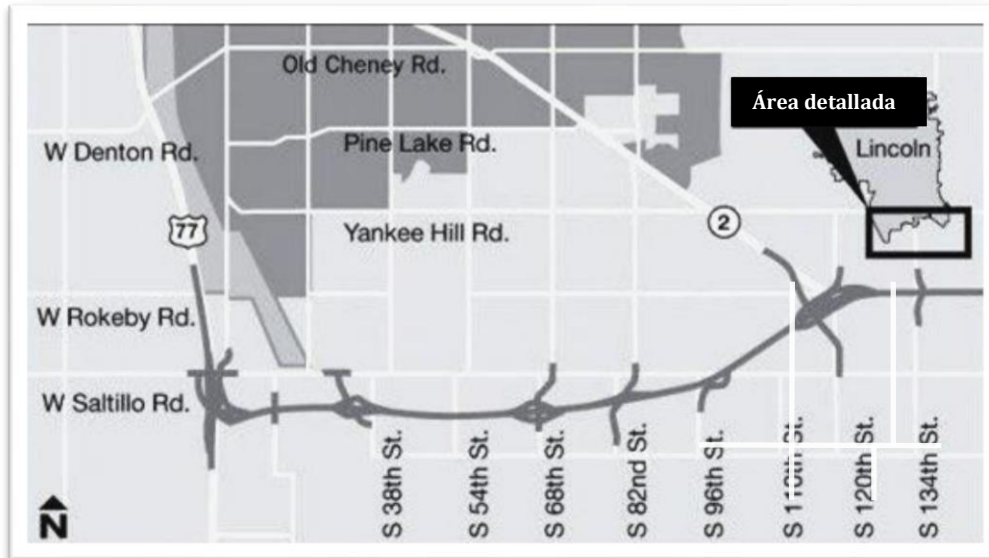

**IMPACTOS POTENCIALES: Cesiones:** la carretera N-2 existente entre aproximadamente entre 120th Street y US-77 se dará en cesión al Condado de Lancaster y la Ciudad de Lincoln al final de la construcción de la carretera de circunvalación con un documento de acuerdo previo firmado. **Medio ambiente:** Impactos ambientales fueran considerados con anterioridad y los mismos están siendo reevaluados; se anticipan impactos permanentes en los humedales y los mismos serán mitigados localmente o en un área regional de humedales. **Económico-Social:** Similarmente estos impactos están siendo reevaluados.

**COSTO ESTIMADO:** El costo estimado de todo el proyecto es de aproximadamente \$200 millones y provendría de fondos federales, estatales y locales. La financiación principal derivaría de fondos del Acta de Ley de Construcción de Nebraska. La ciudad de Lincoln participaría con un 20% de costo compartido.

**ANTECEDENTES HISTORICOS:** Originalmente concebido en la década de los 1970, el concepto del Sistema de Circunvalación de Lincoln fue experimentando una serie de variaciones. La Declaración de Impacto Ambiental (EIS) para los conceptos de sistema de circunvalación Sur y Este fue aprobado en el 2002 contando con la Ciudad de Lincoln, como el organismo líder. Los progresos en el refinamiento a cargo de NDOR se efectuaron hasta el 2006 en la carretera de circunvalación sur cuando la misma fue paralizada en su desarrollo. El proyecto de la carretera de circunvalación sur fue archivado en el 2008 debido a la falta de una fuente de financiación previsible. Actualmente NDOR está siendo proveído con fondos estatales el cual adjuntado con asistencia federal y local, hace el desarrollo, diseño y construcción de la carretera de Circunvalación Sur de Lincoln posible. Los servicios de una empresa consultora fueron contratados y el diseño preliminar de ingeniería está en progreso. Adicionalmente un estudio de Evaluación Ambiental (EA) fue iniciado para evaluar y comparar los impactos de la circunvalación sur como un proyecto independiente. El diseño considerará los cambios en las condiciones ambientales ocurridos desde la anterior Declaración de Impactos Ambientales aprobados en el 2002. Sugerencias del público es vital en esta etapa de desarrollo del proyecto.

تقدير الجدول الزمني للبناء: من المقرر مبدئياً أن يبدأ البناء في وقت مبكر من الربيع من سنة 2020، ويمكن أن يكتمل في غضون خمس إلى سبع سنوات .

مكان الأشغال: سيتم بناء الطريق الجديد المقترح دون تجاوز طرق N-2 أو US-77 سينجر غلق بعض الممرات و مراقبة حركة المرور إلى حدوث تأخيرات في مجال البناء و التشييد .

حق الطريق: تم تخطيط حق الملكية الدائمة لحق الطريق (ROW) في حوالي 730 فدان. و من المتوقع أيضاً نقل محلين سكنيين و محل تجاري. و سيكون الحق في التسهيلات المؤقتة (TE) و مراقبة الولوج (CA) ضرورياً في منطقة المشروع. و من المقرر أن تبدأ أنشطة حق الطريق (ROW) في 2016-2017 .

### الأثار المحتملة:

التنازلات: سيتم التنازل عن طريق N-2 القائم تقريباً بين شارع 120 و US-77 لفائدة مقاطعة لانكستر و مدينة لينكولن عند الإنتهاء من تشييد الطريق بموجب إتفاق وقع إمضاؤه سابقاً. البيئة: تم وضع التأثيرات في عين الإعتبار و يجري تقييمها حالياً. من المتوقع حدوث أثار جانبية بصفة دائمة على الأراضي الرطبة و سيتم تخفيف هذه الأثار محلياً أولدى البنوك الإقليمية للأراضي الرطبة.

التكلفة التقديرية: تقدر تكلفة المشروع بأكمله بحوالي 200 مليون دولار بين تمويلات فدرالية، حكومية و محلية. إن التمويل الأساسي مستمد من قانون تمويل ابني نبراسكا. و ستشارك مدينة لينكولن بحصة تساوي 20% من إجمالي التكلفة .

التاريخ: خضع مفهوم نظام لينكولن بالتوازي إلى عدد من التغييرات منذ أن تم تصميمه في السبعينات. تمت الموافقة على بيان التأثير البيئي (EIS) لجنوب و شرق نظام الطريق السريع في سنة 2002 و كانت مدينة لينكولن الوكالة الرائدة. تطورت التحسينات على مشروع (NDOR) حتى سنة 2006 على الطريق السريع الجنوبي، حينها تم وضع التطورات في الإنتظار و تأجيل المشروع إلى أجل غير مسمى في سنة 2008 نظراً لعدم وجود مصدر تمويل. و قد تم الآن الحصول على تمويل حكومي، فدرالي و محلي لمشروع (NDOR) و أصبح تصميم و تطوير و بناء جنوب بالتوازي لينكولن ممكناً. و قد تم التعاقد مع خبير إستشاري في التصميم بينما مازلت الهندسة الأولية جارية حالياً. إضافة إلى ذلك تم الشروع في دراسة التقييم البيئي (EA) لإعادة تقييم و مقارنة جنوب بالتوازي كمشروع مستقل. و سيتم النظر في تصميم و تغييرات الظروف البيئية التي وقعت منذ أن تمت الموافقة على بيان التأثيرات البيئية (EIS) في سنة 2002. و تعتبر مساهمة الجمهور أمراً ضرورياً في هذه المرحلة من إنجاز تطوير المشروع .

## CUỘC HỘI HỢP Ý KIẾN VỀ DỰ ÁN CÔNG TRÌNH XÂY DỰNG

Lincoln Southwest High School, 7001 South 14<sup>th</sup> St., Lincoln, Nebraska

Ngày 25, tháng 6, thứ ba; từ 4:00-7:00 giờ chiều

### Dự Kiến DPU-LIN-2-6 (120); Số 12578D **LINCOLN SOUTH BELTWAY**

**ĐỊA ĐIỂM:** Theo dự kiến, công trình thiết kế và xây dựng xa lộ South Beltway sẽ tiến hành tại quận Lancaster về phía nam của thành phố Lincoln. Xa lộ South Beltway được bắt đầu từ Nebraska Highway 2 (N-2), khoảng đường South 148<sup>th</sup>, rẽ tại ngã tư của đường South 120<sup>th</sup> để chạy về hướng nam theo đường Saltillo Road và tiếp theo hướng tây để nối liền với U.S. Highway 77 (US-77). Xa lộ South Beltway sẽ chạy giữa hai con đường Saltillo Road và Bennet Road.

**MỤC ĐÍCH VÀ NHU CẦU:** Căn cứ vào bản tường trình Environmental Impact Statement (gọi tắt là EIS) năm 2002 và các dữ kiện trước đây đã nhận thấy được mục đích và nhu cầu cần thiết cho những xa lộ beltways của hướng nam và đông của thành phố Lincoln. Các cơ quan có chức năng đảm nhiệm về dự án này đang nghiên cứu và hoàn tất những dữ kiện cần thiết về hệ thống giao thông, nhằm hỗ trợ cho nhu cầu và lợi ích của dự án xây dựng xa lộ South Beltway, và thừa nhận rằng đây là một công trình xây dựng đầy đủ và trọn vẹn. Mục đích của công trình xây dựng xa lộ South Beltway tại Lincoln là nhằm nâng cao hệ thống giao thông, giảm sự trì trệ lưu thông qua lại giữa hướng tây và đông trong phạm vi thành phố. Mật độ giao thông sẽ giảm đi một tỷ lệ đáng kể vì những tuyến vận tải không đến và đi từ Lincoln nhưng phải đi ngang qua thành phố. Công trình này là cần thiết vì những lý do sau đây:

- Sự gia tăng dân số địa phương và tỷ lệ lưu thông đòi hỏi sự nâng cấp của hệ thống giao thông
- Lưu lượng giao thông giữa hai xa lộ chính I-29 và I-80 thường đi qua Lincoln trên con đường hẹp N-2, và phải dừng lại nhiều ngã tư khi có đèn đỏ, gây trở ngại và bất tiện cho vấn đề giao thông của thành phố địa phương.
- Những xe vận tải lớn (và một số khác đi ngang qua nhưng không đến Lincoln) phải dùng chung những tuyến đường địa phương, tạo nên sự khó khăn trong vấn đề giao thông trong vùng.

**MẬT ĐỘ GIAO THÔNG:** Nebraska Highway 2 (N-2)

Năm (Những dự án từ 2002 EIS, những nghiên cứu tiền triển mới)	2012 (Xa lộ cũ N-2)	2013 (Xa lộ mới Beltway)
Số xe trong ngày (ADT)	15,800	20,500
% Xe vận tải lớn	22%	24%

**PHẠM VI CÔNG TRÌNH:** Công trình này sẽ thiết kế một đường giao thông gồm 4 lane. Có những lối rẽ ra những đoạn đường như: US-77, Saltillo Road, đường 27<sup>th</sup>, 68<sup>th</sup>, 84<sup>th</sup>, và 120<sup>th</sup>. Đi qua trên những đoạn đường sau: đường 25<sup>th</sup>, Homestead Trail, BNSF Railroad, đường 54<sup>th</sup>, Saltillo Road (hướng đông của đường 98<sup>th</sup>), OPPD Rail Spur, và đường 134<sup>th</sup>. Tuyến đường giao thông nâng cấp này sẽ được thiết kế theo kiểu mẫu xa lộ cao tốc (Expressway standards).

**THỜI ĐIỂM XÂY DỰNG:** Khởi điểm của công trình này được dự tính bắt đầu mùa xuân (spring) của năm 2020 và sẽ được hoàn tất trong vòng năm đến bảy

năm.

**DỰ TÍNH THÍCH ỨNG CỦA LƯU LƯỢNG GIAO THÔNG:** Theo dự tính, công trình xây dựng này sẽ tránh sự đi vòng trên con đường N-2 hoặc US-77. Những hương lộ (lane) đóng góp với sự thích ứng của lưu lượng vận chuyển có thể gây sự chậm trễ tạm thời cho vấn đề giao thông trong phạm vi công trình.

**SỞ HỮU CÔNG TRÌNH:** Quyền sở hữu của công trình (right-of-way) sẽ thực hiện trên diện tích ước tính khoảng 730 mẫu (đất). Một khu thương mại và ba khu dân cư sẽ di chuyển theo dự đoán. Những luật định về quyền sở hữu tạm thời (Temporary easements - TE) và quyền giao thông (Control of Access - CA) sẽ được sử dụng trong phạm vi công trình xây dựng.

**TIỀM NĂNG TỐN THẤT:** *Sự tổn thất (relinquishments):* Tuyến đường cũ N-2 từ khoảng đường 120<sup>th</sup> đến US-77 sẽ không còn và được giao nhượng cho quận Lancaster và thành phố Lincoln vào thời điểm công trình được hoàn tất theo một hiệp định đã được ký trước. *Môi trường (Environmental):* Sự ảnh hưởng và thiệt hại môi trường đã được đánh giá và đang được xem xét lại. Khu vực đất bùn lầy sẽ hình thành và tồn tại vĩnh viễn gây ảnh hưởng đến môi trường sống. Vấn đề này sẽ được giúp đỡ của cơ quan địa phương trong vùng để giảm bớt sự ảnh hưởng.

## CUỘC HỘI HỢP Ý KIẾN VỀ DỰ ÁN CÔNG TRÌNH XÂY DỰNG

**DỰ TÍNH PHÍ TỔN:** Ước tính chi phí cho tổng thể công trình lên đến khoảng 200 triệu mỹ kim, và nguồn chi phí này được tài trợ từ ngân sách liên bang, tiểu bang và thành phố địa phương. Phần lớn nguồn tài trợ đến từ ngân sách của Build Nebraska Act. Thành phố Lincoln sẽ đóng góp khoản tài trợ là 20% trên tổng số chi phí.

**LỊCH SỬ CỦA CÔNG TRÌNH:** Khái niệm xây dựng hệ thống xa lộ Beltway tại Lincoln đã được nảy sinh từ thập niên của năm 1970, và được cứu mang, nghiên cứu qua nhiều phương diện tổng thể. Với những khái niệm rõ ràng nêu ra trong bản tường trình của sự thiệt hại về môi trường sinh thái (Environmental Impact Statement – EIS) cho việc thực hiện hệ thống xa lộ beltway của hướng nam và hướng đông, thành phố Lincoln đã được chứng nhận năm 2002 là cơ quan tiên phong trong lãnh vực này. Sự kiểm tra nghiên cứu kỹ lưỡng của dự án NDOR về hệ thống xa lộ beltway tiếp diễn đến năm 2006 cộng với sự dự đoán thiếu hụt ngân sách nên đề án xa lộ beltway đã được tạm gác lại trong năm 2008. Dự án NDOR giờ đây đã được nguồn tài trợ kinh phí của tiểu bang, liên bang cùng với chính quyền địa phương. Nguồn tài trợ đặc biệt này làm cho công trình xây dựng hệ thống xa lộ South Beltway tại Lincoln được hình thành. Cố vấn cho công trình đã được thuê và khởi đầu quá trình kiến trúc xây dựng đang được nghiên cứu. Thêm vào đó, sự nghiên cứu về Khảo Sát Môi Trường Sinh Thái (Environmental Assessment – EA) đã giám xét và so sánh sự ảnh hưởng của việc xây dựng xa lộ South Beltway, cho rằng đây một dự án trọn vẹn đầy đủ. Đề án xây dựng này sẽ được cân nhắc thận trọng trong việc kiến thiết cùng với những điều kiện thay đổi về môi trường sinh thái xảy ra dựa trên bản tường trình (EIS) đã được chứng nhận trong năm 2002. Sự đóng góp ý kiến của cộng đồng địa phương trong giai đoạn này là rất cần thiết cho sự tiến triển của dự án South Beltway.

# HOW TO PARTICIPATE

## NDOR is SEEKING YOUR THOUGHTS

Comments on the following topics would be helpful at this stage in the study:

- Project Purpose and Need
- Environmental or Community Issues of Concern
- Issues Related to the Alignment or Layout of the South Beltway
- Other Comments

Please share your input on a **Comment Form**, available at the **Comment Station**, or after the meeting to:

### Greg Weinert

Public Participation Coordinator  
Nebraska Department of Roads  
PO Box 94759

Lincoln, Nebraska 68509-4759

email: [greg.weinert@nebraska.gov](mailto:greg.weinert@nebraska.gov)

[www.transportation.nebraska.gov/projects/south-beltway/](http://www.transportation.nebraska.gov/projects/south-beltway/)

The project sponsors include the Nebraska Department of Roads, Federal Highway Administration, the City of Lincoln, and Lancaster County.

Many groups and organizations have been invited and are expected to participate in this important regional project, including:

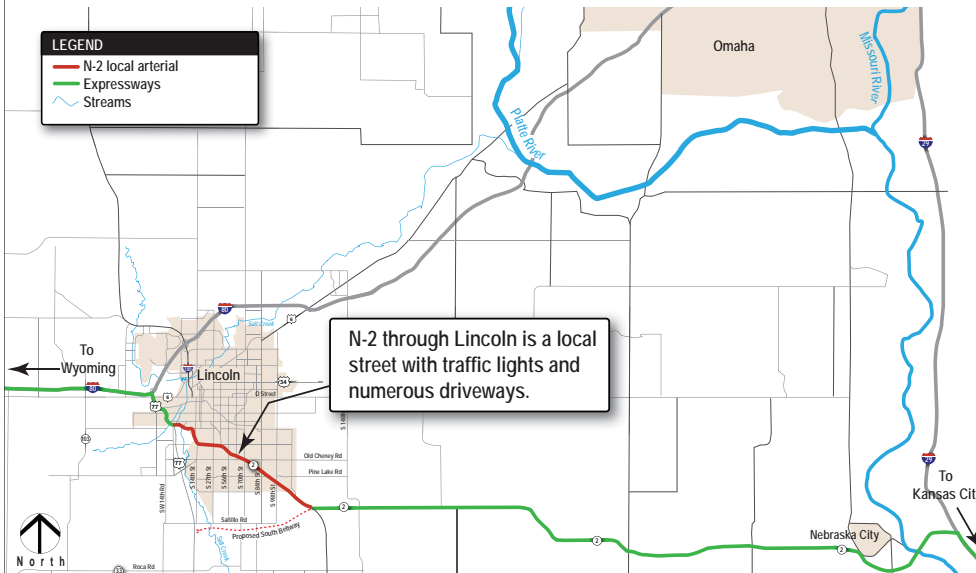

- Development / Real Estate Interests
- District 1 Highway Commissioner
- Environmental Resource Agencies
- Friends of Wilderness Park
- Land Owners / Residents
- Lincoln Chamber of Commerce
- Lincoln Independent Business Association
- Private Businesses
- School Districts
- State Legislators
- Trail / Bicycle Advocates
- Trucking Associations
- Railroads
- Utilities
- Villages of Hickman, Roca and Bennet

# PURPOSE AND NEED

The 2002 Environmental Impact Statement and other previous studies identified the purpose and need for south and east beltways around Lincoln. The project sponsors are currently updating traffic and other analyses originally used to support the needs and benefits of the South Beltway and validate it as a stand-alone project.

## PROJECT PURPOSE

- The purposes of the project are to
1. Improve the function of local and regional transportation networks by reducing conflicts between trips not destined for the City of Lincoln and local trips within the City.
  2. Improve east-west connectivity for commuter and freight trips through the City.

## The PROJECT is NEEDED because:

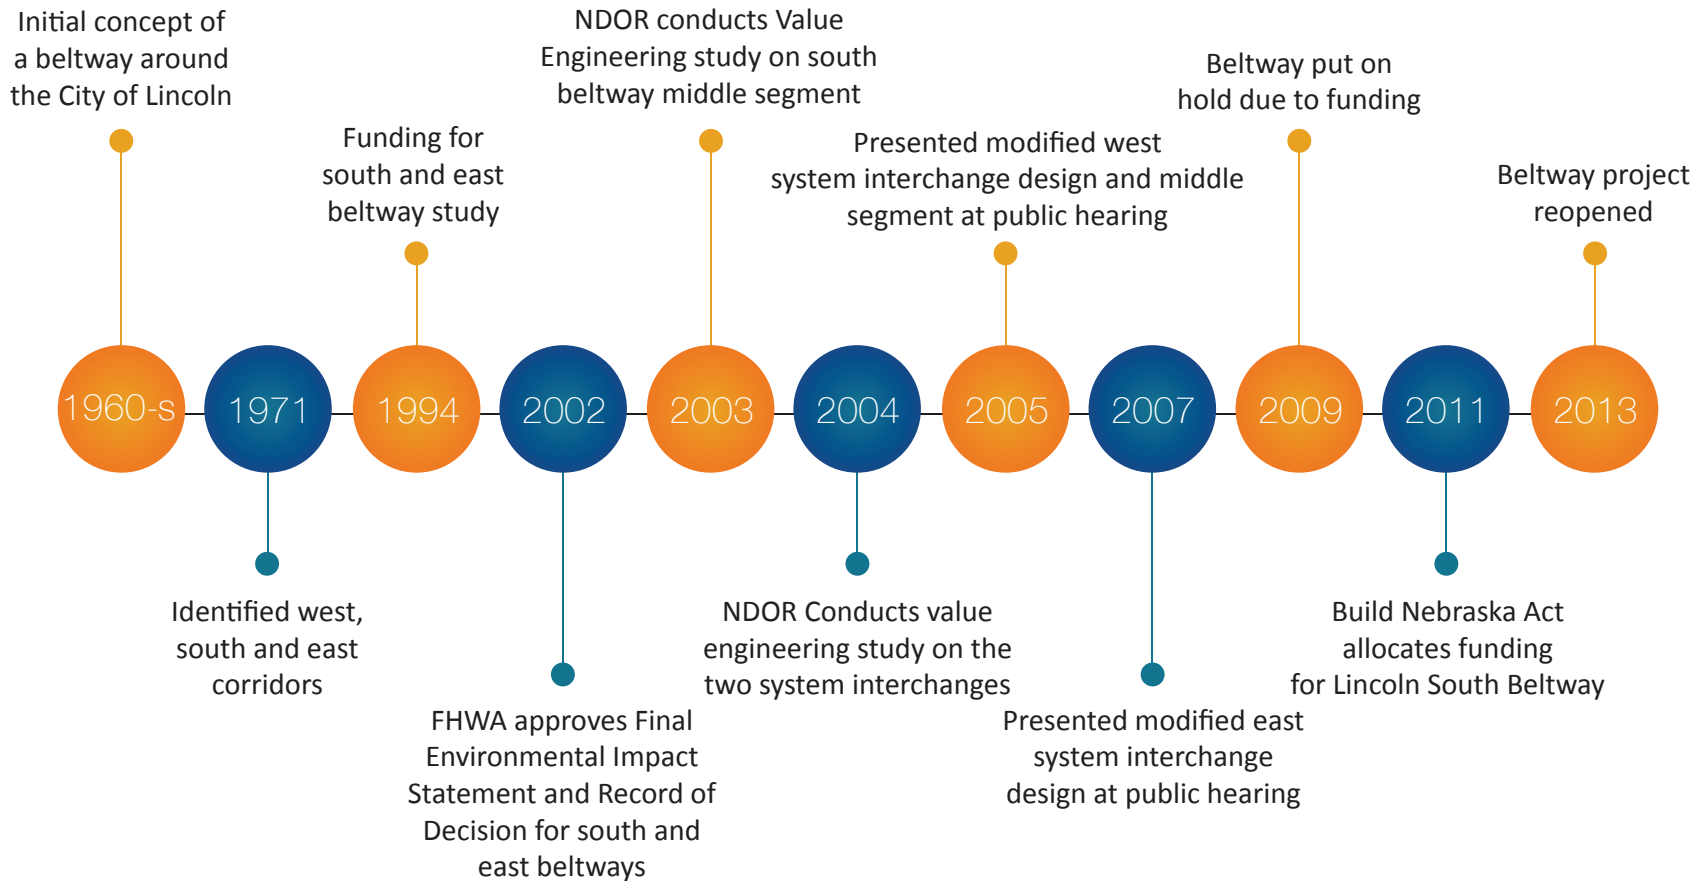

- 1. Regional population and traffic growth has increased demands on Lincoln's transportation network.**

Population and traffic volumes in the City of Lincoln and Lancaster County have increased steadily. Development has concentrated on the edges of the City, with strong growth to the south and east.
- 2. Interstate traffic traveling from I-29 west to I-80 passes through Lincoln on an urban arterial street (N-2), stopping at numerous traffic lights and conflicting with local traffic.**

The Lincoln South Beltway would complete a link in the regional transportation network to allow interstate trips to move across Lincoln on a more appropriate expressway facility.
- 3. Trucks and other traffic passing through but not stopping in Lincoln share routes with local traffic, which creates mobility and vehicle conflicts between regional/interstate and local trips.**

The Lincoln South Beltway can serve freight and interstate trips through Lincoln more efficiently and with less conflict than the current N-2 route.

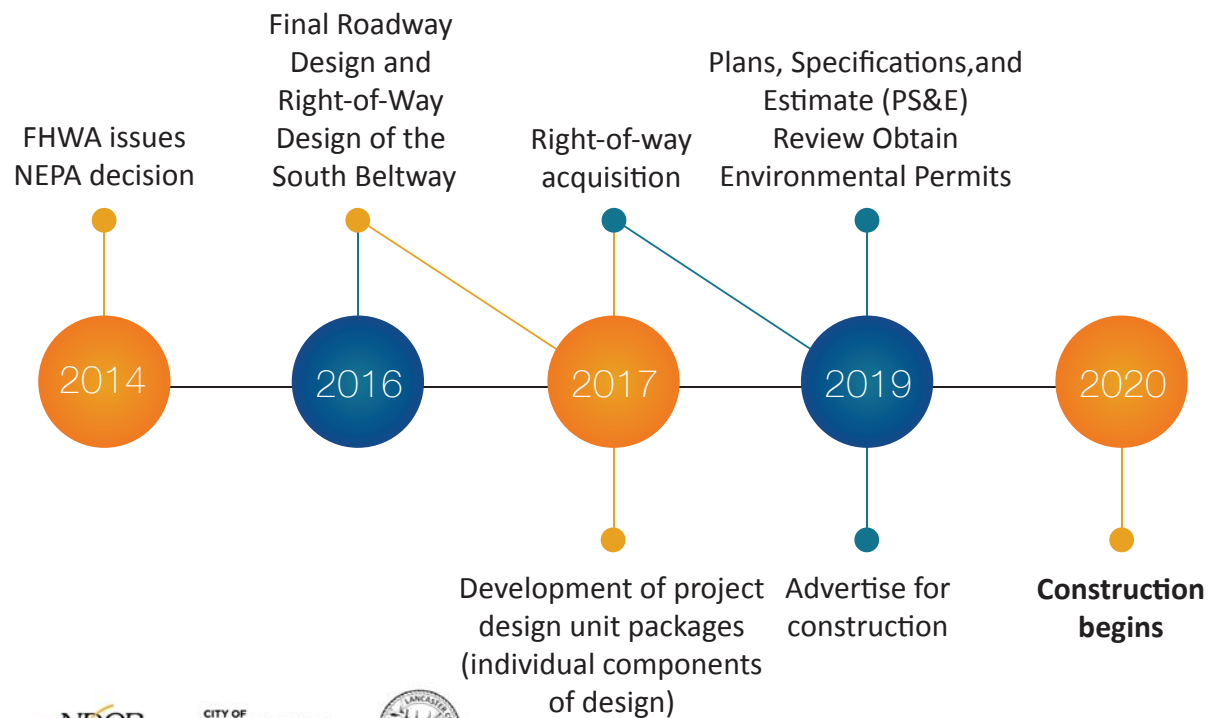

# WHERE WE'VE BEEN - PROJECT HISTORY

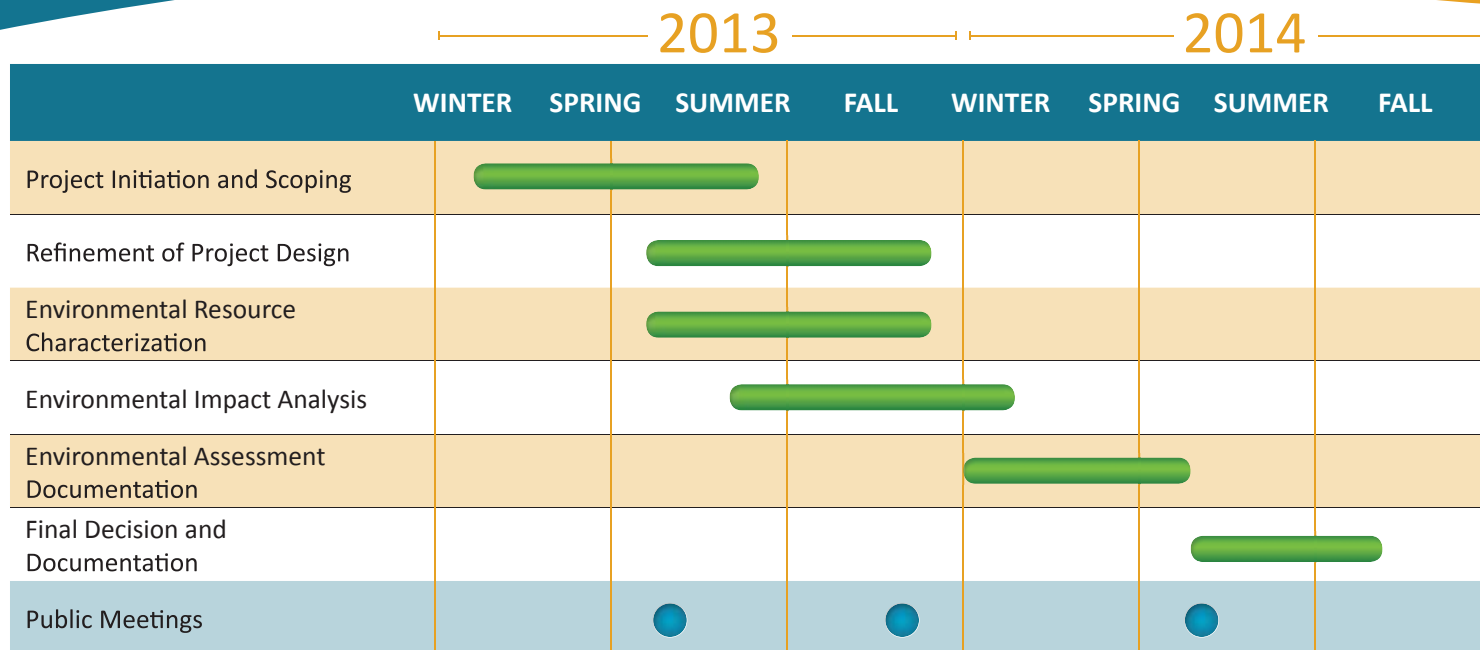

# WHERE WE ARE GOING - FUTURE OF THE LINCOLN SOUTH BELTWAY

After receiving public and agency comments on the Environmental Assessment, FHWA will issue a decision document. This document records the decision made by FHWA on the re-evaluation of the project design and impacts. If approved to move ahead from the NEPA phase, the following represents a general timeline to completion of the South Beltway. Currently funding is anticipated in 2020; if funding were available sooner, the project sponsors would look for opportunities to accelerate the schedule.

# PLANNED ENVIRONMENTAL ASSESSMENT SCHEDULE

For federally-funded transportation projects, the National Environmental Policy Act (NEPA) requires that the environmental impacts of the proposed action be analyzed. This type of study is required before federal funds can be committed to the project. The Federal Highway Administration (FHWA) is the lead federal agency on the Lincoln South Beltway Environmental Assessment. This NEPA study is a re-evaluation of the Environmental Impact Statement (EIS) that was completed in 2002 and is required to assess changes in the design or environment that have occurred since the EIS was approved.

# NATURAL RESOURCES

## COMMUNITY ISSUES

## Resources to be Reviewed in the Environmental Assessment

- Air Quality
- Environmental Justice
- Farmlands
- Floodplains
- Hazardous Materials
- Historic Properties
- Land Use
- Noise
- Pedestrians and Bicycles
- Railroads
- Recreation
- Right-of-Way
- Section 4(f)/6(f)
- Socioeconomics
- Threatened and Endangered Species
- Transportation (Traffic/Safety)
- Utilities
- Vegetation/Noxious Weeds
- Water Quality/Water Resources
- Wetlands & Streams
- Wildlife
- Visual Conditions/Lighting

## EIS IDENTIFIED IMPACTS TO RESOURCES

The 2002 South and East Beltways Final Environmental Impact Statement and Final Section 4(f) Statement (EIS) documented the project needs and development of alternatives for beltways along the south and east perimeters of the City of Lincoln. The EIS also fully evaluated the potential environmental impacts of these new roadways. The purpose of this Environmental Assessment study is to reassess and compare the impacts of the South Beltway as a stand-alone project, considering the design and environmental condition changes that have occurred over the past decade.

# SUMMARY OF 2002 EIS FINDINGS

## IMPACTS & MITIGATION COMMITMENTS

### SUMMARY OF IMPACTS IDENTIFIED IN 2002 EIS SOCIAL AND COMMUNITY ISSUES

### MITIGATION COMMITTED TO IN 2002 EIS

<b>Air Quality</b>	Project area is in attainment for particulate matter (PM10) and carbon monoxide. Although long-term increases in carbon monoxide and PM10 levels would be expected, no violations of National Ambient Air Quality Standards are expected. Fugitive dust during construction would temporarily raise PM10 concentrations and cause short-term impacts to ambient air quality.	Dust control during construction.
<b>Environmental Justice</b>	No disproportionate impacts to low income or minority populations. <ul style="list-style-type: none"> <li>The median household income for the study area is substantially higher and the number of persons below the poverty level is substantially lower than Lancaster County averages.</li> <li>The minority population in the study area is substantially lower than Lancaster County averages.</li> </ul>	None required.
<b>Hazardous / Solid Wastes</b>	Two underground storage tank (UST) facilities located at the intersection of US 77 and Saltillo Road (no releases from underground tanks have been documented). Seven reported surface spills originating from three facilities have occurred on or around the US 77 and Saltillo Road intersection. Contamination expected at spill locations. Database information insufficient for 4 of the spills, extent and exact location of those spills unknown. Remaining three spills require no further action.	NDOR standard provisions.
<b>Historic Properties</b>	Eight National Register-eligible historic buildings identified in the study area. One would be adversely affected through visual intrusion from the beltway. No archaeological sites identified in the study area. One area not surveyed due to access restrictions.	Memorandum of Agreement developed to mitigate visual impacts to historic property and facilitate private donations. Relocate historic marker at Saltillo Rd/S 14th Street. Complete archaeological survey in bottom lands where access was denied. NDOR standard provisions.
<b>Land Use</b>	Current land use in the study area is primarily agricultural. Land use is beginning to transition from agricultural to suburban uses, and this projection of land use change is reflected in the Comprehensive Plan. Project would have no impact on air traffic or use of three private airfields.	None required.
<b>Noise</b>	Project would result in noise impacts at five residences (four impacts in single subdivision, one isolated residence), with noise levels up to 70 dBA at impact residences, increase up to 17 dBA above existing levels at isolated residence. Majority of study area would not experience impacts.	Noise barriers were evaluated but determined not to be feasible and reasonable.
<b>Pedestrian and Bicycles</b>	The Wilderness Park Trail is located within the study area but not within the footprint of the beltway. The Beltway does not cross or impact any existing trails. Project would cross proposed Jamaica North Trail and Homestead Trail.	If Jamaica or Homestead trails are built prior to beltway, beltway would provide appropriate crossing over trail.
<b>Recreation</b>	No impacts to existing recreation areas. Project would cross proposed Jamaica North Trail in vicinity of Salt Creek bridge.	Trail mitigation discussed above. No additional mitigation required.
<b>Right-of-Way</b>	Acquisitions would be required. <ul style="list-style-type: none"> <li>One business, Major Oil Company, and three residences would be displaced and need to be relocated.</li> <li>296 hectares of right-of-way required.</li> </ul>	All property acquisitions will comply with Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970 and associated FHWA and NDOR procedures.
<b>Socioeconomics</b>	Lincoln and Lancaster County have experienced economic and population growth over the past three decades. Project would have little to no effect on population. Loss of less than 1% loss of tax revenue in county due to right of way acquisition may be off set due to increased property values. Economic benefits from increased transportation efficiency.	None required.

# SUMMARY OF 2002 EIS FINDINGS

## IMPACTS & MITIGATION COMMITMENTS

### SUMMARY OF IMPACTS IDENTIFIED IN 2002 EIS SOCIAL AND COMMUNITY ISSUES

### MITIGATION COMMITTED TO IN 2002 EIS

<b>Railroads</b>	The beltway would cross three railroad lines (UP, BNSF, OPPD).	All railroad crossings over active lines would be grade separated.
<b>Section 4(f) / 6(f)</b>	No direct use of historic properties. Adverse visual effect to historic farmyard is not severe enough to meet threshold for constructive use. No use of trails, recreation areas, or wildlife refuges.	None required.
<b>Transportation (Traffic, Safety)</b>	Move through traffic from urban area to regional facility, and reduce delay and improve traffic flow on existing urban street system. Reduce truck traffic on rural roadways on the fringe of metro area. Improve Safety by moving trucks and other traffic from congested urban streets to more appropriate high speed limited access freeway facility.	Right-of-way around the new beltway would be fenced. See Visual impacts for lighting mitigation considerations.
<b>Utilities</b>	Majority of utilities found in study area are commonly encountered during roadway projects and easily relocated. There are a few major utilities that would require additional consideration due to high cost of relocation.	Relocations will be determined during final design. Approvals will be obtained from affected utility.
<b>Visual/Lighting</b>	The visual characteristics of the study area would be altered in the area to the proposed bridges, overpasses, and interchanges and would primarily affect nearby residents. New lighting would create visual impacts to relatively dark areas with minimal existing street lighting.	Lighting locations would be determined during final design. Visual impacts on surrounding land uses will be considered during final design. To the extent possible, lighting design will minimize intrusion.
<b>Farmlands</b>	Agriculture is the predominant land use in the study area. Estimated that 16 farms would be bisected. Project would require conversion of prime and unique farmland to transportation use which represents less than 1% of prime and unique and total farmland in the county. Farmland Conversion Impact rating (south and east beltways combined) is less than 160, requiring no further consideration per US Department of Agriculture.	Reduce required right-of-way needs during final design as feasible to reduce impacts.
<b>Floodplains</b>	Alignment crosses 100-year floodplain of Salt Creek including the main stem and several tributaries. A floodway has not been established in these areas. All channels anticipated to remain in current configurations.	Project will comply with City/County floodplain management ordinance. Will require design modifications to reduce conflicts with proposed farm ponds.
<b>Threatened and Endangered Species</b>	The study area includes habitat ranges for seven federal and state endangered and threatened species (the Bald eagle, Peregrine falcon, American burying beetle, Salt Creek tiger beetle, Western prairie fringed orchid, Small white lady's slipper, and Saltwort). No effect to these species based on field surveys, lack of suitable habitat, and no known occurrences in study area.	Conduct updated surveys as appropriate before construction.
<b>Vegetation/ Noxious Weeds</b>	Mostly agricultural with riparian vegetation along Salt Creek and tributaries. No native prairie parcels.	NDOR standard provisions.
<b>Water Quality/ Water Resources</b>	Temporary impacts to surface water from erosion and sedimentation during construction of bridges and culverts at stream crossings. Slight increase in pollutant loads in surface waters due to increase in impervious surface. No impacts to groundwater.	NDOR standard provisions.
<b>Wetlands</b>	Wetlands were identified primarily along Stevens Creek, Salt Creek and their tributaries, as well as in isolated depressions and impoundments. The project is expected to impact a total of 18.0 acres of wetlands in 19 locations throughout the study area.	Impacted wetlands will be replaced at a minimum of 1:1 ratio. Replacement sites could be located in the corridor or at the City of Lincoln's wetland mitigation bank (under development in 2002).
<b>Wildlife</b>	Common wildlife and fish species inhabit the study area. Minor disturbance of wildlife and aquatic habitat but not expected to affect wildlife populations.	NDOR standard provisions.

**Sent:** Saturday, March 30, 2013 2:37 AM  
**To:** Weinert, Greg  
**Subject:** Lincoln South Beltway Project - email from project page

As a concerned citizen, I fully support this project due to the need to divert large trucks and future heavy traffic around the city so the future drivers of Highway 2 inside the city can flow easier and more accidents are avoided. Please stress this project and move it forward. Don't let the South Beltway die! We need it ASAP!

Thank you.

Phone (402) 471-4567 • FAX (402) 479-4325 • [www.transportation.nebraska.gov](http://www.transportation.nebraska.gov)

January 7, 2014

Dear Mr. Nispel:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments supporting this project as a way to divert trucks and other heavy traffic, increase ease of travel through Lincoln and a way to avoid accidents have been passed along to and are be considered by our engineering and environmental team. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:

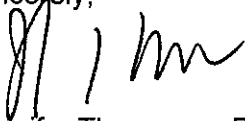

[www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

**To:** Goodbarn, Thomas  
**Subject:** South Beltway hearing, Lincoln,NE - cycling access across

Tom,  
Thank you for sheparding this extremely important project.

I would really like this project to allow for cyclist to cross this beltway at three points: 1) to the southwest – to allow access to HWY 77 and the future bike path to Denton, 2) ability to cross over 70/68<sup>th</sup> street interchange and 3) over/around/attached to Hwy 2. Road bikers have for years enjoyed the paved roads that our DOR folks have provided for us to use. This is a great way to encourage people to take care of our health. Another plus of these connections will be allowing long cycling road races to happen, which bring in significant tourist dollars to communities.

Appreciate your kind consideration of these comments. Please feel free to contact me. I am out of town for this open house.

Thank you,

***Kent Thompson***

**Subject:** RE: SOUTH BELTWAY PUBLIC MEETING

I won't be able to make this meeting. However I am strongly concerned about making connections for cyclist to be able to cross through this much needed belt way to continue cycling south. We need links at the west end, the Middle – 68<sup>th</sup> Street and East either with HWY 2 and/or going thru a paved pathway area around 96<sup>th</sup> street.

LuAnn,

I'm not sure how the environmental reviews will be organized but I imagine the City's Public Works & Utilities Dept. will be our lead agency. Miki Esposito is the director of PWU and has a background as an environmental attorney so she may be the best starting point.

Her email is [mesposito@lincoln.ne.gov](mailto:mesposito@lincoln.ne.gov)

**To:** Ed Zimmer  
**Subject:** Beltway

Hi Ed:

I hope all is well.

UNL and the Dept. of Anthropology Summer Field School in Archaeology would like to be involved in any cultural resources mitigation associated with the southern beltway development. I see the possibility for involving the public (e.g., archaeology day camps for kids and adults) as well as our Native American students.

Can you tell with whom I would speak on this matter?

Thanks,

LuAnn

## STATE OF NEBRASKA

DEPARTMENT OF ROADS

**Randall D. Peters, P.E.,** Director – State Engineer

1500 Highway 2 • PO Box 94759 • Lincoln NE 68509-4759

Phone (402) 471-4567 • FAX (402) 479-4325 • [www.transportation.nebraska.gov](http://www.transportation.nebraska.gov)

January 7, 2014

Dear Ms. Wandsnider:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding Summer Field School in Archaeology involvement on the Beltway have been passed along to and are being evaluated by our engineering and environmental team. Cultural resources mitigation will be addressed and part of our documentation efforts. For further information on cultural resources regarding this effort, we would invite you to contact:

Ms. Jill Dolberg  
Nebraska State Historical Society – State Historic Preservation Office  
[Jill.dolberg@nebraska.gov](mailto:Jill.dolberg@nebraska.gov)  
402.471.4773

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Dear Sir,

I am writing in hopes that this terrible idea can die. The plan notes that it was dreamed up in the 1970's, and that's where the dream should stay. It is not right for Nebraska today, nor was it ever. This plan is only designed to help Lincoln grow, with more and more developments of McMansions on what should remain ag ground. If the State and the City can draft an agreement that this land shall never be developed, and that Lincoln city limits will never grow, I would be all for it, but such is not the case. This plan has died and been resurrected so many times it should appear obvious that it is a bad one, just let it die. We, a rural state, do not need to help urban sprawl. I recommend taking a bulldozer and plowing the homes and businesses along the current Highway 2 in Lincoln to build your freeway, Lincoln is the one that wants it so bad, let it be the one to sacrifice.

This is a bad plan that is bad for Nebraska, bad for ag, and bad for humans; good for big developers, good for urban sprawl, and good for nothing.

Sincerely,

Wesley Halvorsen

**To:** Weinert, Greg  
**Subject:** South Beltway

Thank you again Greg, for the conversation of this afternoon regarding the proposed Beltway and Environmental Assessment to update the Impact Statement. I am writing to express my concern that this assessment consider addressing the issue of wildlife that will be affected by the construction and utilization of the beltway.

On a recent visit to Canada, I observed that they had addressed the needs of wildlife in building the new trans-Canada Highway 1. Not only was it fenced high enough to deter large animals, but they had built in a series of underpasses and arched overpasses, with the fences channeling the animals to them. It was esthetically beautiful... Not a dead carcass to be seen and wide road that allowed travelers to take in the vista.

Obviously, our little beltway is a much smaller project, but it is a significant opportunity for Nebraska to construct an important section of highway with consideration of our human encroachment on wildlife habitat. Building it in such a mindful way not only offers protection to the animals, but also provides significant reduction in costly accidents, as noted in the reduction of collisions with deer on the section of I 80 on the east side of the Platte River. This is a monetary advantage to both vehicle owners, emergency personnel and the insurance industry.

I am most hopeful that our ability to protect both animals and travelers will be a significant conversation and consideration as the Beltway project moves forward.

Sincerely,

Judy Greenwald

I am concerned about bikes having access to ride out of the city if these freeways cause areas to be restricted <sup>so that</sup> ~~so that~~ bikers can't ride on Hwy 277. I am overall very supportive of the beltway, but I want to be ensured ways to also bike long distances.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Good afternoon!

I won't be able to attend the Open House for this project, as I will be attending a Lincoln open house for a proposed bike path.

Overall I like this idea, as currently there are way too many semi-trucks traveling through Lincoln on Hwy 2. I grew up near 40th and Hwy 2, and when learning to drive I knew to always look twice for any semis that may be running a red light because they were not able to stop. I think a beltway could help solve the problem.

I would want the people whose properties are bought to be purchased at the high-end of the market value, as they are sacrificign their homes for the overall good of the city.

Thanks,  
Cindy  
Lincoln, NE

Last week on highway 2 and 48th a semi blew through the red light at around 9:40am. If I had started a few seconds earlier, as the light was green, or someone on the other side had, I would have been dead. The semi was going at least 50. It was obvious he was trying to best the light so he didn't have to start and stop-which is why they shouldn't be in hwy 2.

Dear Ms. Blazey:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway and the need to move heavy truck traffic off of current Nebraska Highway 2 have been passed along to our engineering and environmental team. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

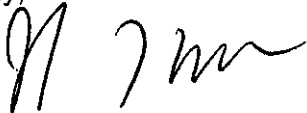

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:  
[www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

M. Solo Mwanja  
5241 Ponytial Ct.  
Lincoln NE 68516

Dear M. Mwanja:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway project have been passed along to our engineering and environmental team. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

I Fully support the need For a South Beltway  
However I do not agree with naming it  
a freeway which will keep bicycles from  
using it. Cyclist still need a way to  
ride South on the ~~highway~~ highway to go ~~to~~ South  
on highway 77 - a hard surface road.  
With a 12 Foot Shoulder it would be  
Totally safe for Bikes to be there

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

I would like to see this get done as soon as possible - (So Beltway)

Would also like to see the Old Cheney & 14th / Swarlock get done - or at least a middle lane - left turn lane option for Southbound vehicles on 16th street to turn left on Old Cheney.

Please look into improving Sun Valley Blvd. - wider, new bridge and bike lane.

I'm also in favor of N 5th bike lane.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

January 7, 2014

Dear Mr. Dahlin:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway project have been recorded. The improvements at the 14th Street / Old Cheney / Warlick Boulevard intersection are a City of Lincoln project and any comments should be directed to the City. Likewise, the bike lanes on N Street are also a City project. Sun Valley Boulevard is a State Highway and your comments have been forwarded to the District Engineer and to NDOR's planning and project development group. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:

*for a bike*

I am concerned about access to west Lincoln from East of the ~~bypass~~ west bypass. Most cyclists in my part of town use Old Cheney to get west of town. Pioneers is not a good alternative because it dead-ends at Hwy 2 and there is no good bike way between 14<sup>th</sup> and Pioneers to the west of Hwy 2.

In addition, I am concerned about access to the south of Lincoln for bikes. I use 14<sup>th</sup> Street to Salt:No to Hwy 77. I am concerned that options being considered will require me to go out of my way to get out of town or back into town.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

February 10, 2014

Dear Mr. Rowe:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding access to West Lincoln for Bicyclists have been considered and connectivity for bicyclists has been addressed.

NDOR has established a website for the Lincoln South Beltway project. An informational video regarding bicycle connectivity, information from the last public meeting, as well as announcements of future meetings, is available at: [www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

I own a business near 110<sup>th</sup> and Salt.110. It is very important to me that Salt.110 Rd continues the way it is now and is not cut off by the Beltway. Please make sure The Beltway goes over Salt.110 and does not cut off Salt.110. Also, Please pave Salt.110 from 98<sup>th</sup> to 120<sup>th</sup> as soon as possible. Semi's come down this road very fast. We have lost 6 windshields in the last couple years due to flying rocks. I am worried one of these flying rocks could hurt somebody.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

## STATE OF NEBRASKA

DEPARTMENT OF ROADS

Randall D. Peters, P.E., *Director - State Engineer*

1500 Highway 2 • PO Box 94759 • Lincoln NE 68509-4759

Phone (402) 471-4567 • FAX (402) 479-4325 • [www.transportation.nebraska.gov](http://www.transportation.nebraska.gov)

January 7, 2014

Dear Mr. Clark:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding Saltillo Road have been passed along to our engineering and environmental team. Saltillo Road will become an overpass over US Highway 77 on the West end. Saltillo Road will continue on to the East end near 98th Street. Any paving on Saltillo between 98th and 120th Streets will be a City of Lincoln project. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:  
[www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

Mr. Rick Clark

The reports/charts should also reflect the significant numbers of residents who will have a better & safer quality of life. Reduction of noise & emissions in a high population area is a very positive aspect that should be presented to the public. I've lived with Hwy 2 being 1 block from my home (speed limit decrease to 55 mph) for 28 years - I want this to be built 10 years ago. During the 2002 study time.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

As a member of the village of Roca Planning Commission there is concern of how much, if any, traffic will occur on either S. 46th or S. 54th. For planning purposes will this increase the desire for homes & commercial development. Perhaps this is more a county concern but the state could assist.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

THIS MUCH NEEDED ROADWAY ADDITION SHOULD HAVE BEEN BUILT YEARS AGO AND THE QUICKER WE GET IT UP IN THE PRIORITY LIST THE BETTER.

EVERY HIGHWAY 2 ACCIDENT HAS SOME RELATIONSHIP TO THE LACK OF THE SOUTH BELTWAY BEING CONSTRUCTED ALREADY.

I ALSO BELIEVE THAT AS SOON AS THE SOUTH IS FINISHED, THE EAST BELTWAY SHOULD IMMEDIATELY START CONSTRUCTION AND PLANNING SHOULD BEGIN NOW TO HAVE THAT A SHODD READY PROJECT AT THAT TIME.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Mr. Dick Campbell  
6111 Chartwell Ln  
Lincoln NE 68516

Dear Mr. Campbell:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South beltway project have been recorded. The East Beltway is still being planned as a City of Lincoln project. As it relates to the South Beltway, NDOR is required to coordinate with the MPO and consider their future plans for an East Beltway. The design of the South Beltway allows for a future East Beltway connection. East Beltway Right of Way has been, and continues to be, purchased. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Mr. Dick Campbell

January 7, 2014

Mr. John Hendricks  
10901 S 19th St  
Roca NE 68430

Dear Mr. Hendricks:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway project have been recorded. Your concerns regarding closure of Rokeby Road have been passed along to our engineering and environmental team for consideration. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

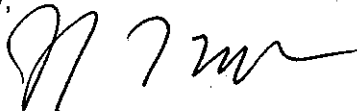

Mr. John Hendricks

bicycle

If access for Hiway 2 + 77 is going to be eliminated due to the Interstate Rule, extra right-of-way needs to be purchased for bicycle/pedestrian trails or parkways along those routes as well as the Beltway.

It's unthinkable that a major Hiway project these days would not include bicycle access.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

- 1) Bike access to these beltways (77 + 2) is important to the citizens ~~and~~ and cyclists of Lincoln + surrounding communities. These roads are access points to some of the best cycling. Prohibiting cyclists would be a large step backward for Lincoln. Nebraska is one of the lowest rated bike friendly states. Lets take steps forward rather than backward.
- 2) I would love to see the NDOR become the NDOT and have a stronger emphasis on transportation and less on roads. Its just a word but speaks volumes.
- 3) NDOR - I would like to see the internal policy of trails not included in right-of-way removed. Especially important to MoPac trail connection.
- 4) I would like to see as much <sup>bike</sup> trail and or linear park included in the new beltway right-of-ways as possible. Its important and worth the extra money. Also extend wilderness park as much south <sup>as possible</sup>. Thanks!

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

February 10, 2014

Dear Mr. Blakewell:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding access for bicyclists have been considered by our engineering and environmental team. Additionally, it has been noted that your preference would be for Nebraska to have a Department of Transportation versus a Department of Roads designation to better promote all modes of transportation. Your support for including trails within the Right of Way, a linear park along the beltway, and the extension of Wilderness Park have been documented as part of our Environmental Assessment process..

NDOR has established a website for the Lincoln South Beltway project. An informational video regarding bicycle connectivity, information from the last public meeting, as well as announcements of future meetings, is available at: [www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

Ms. Erika Hill  
6206 Inverness Rd  
Lincoln NE 68512

Dear Ms. Hill:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway project have been recorded. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

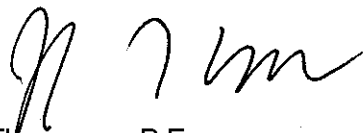

Ms. Erika Hill

I like the project for many reasons and I think we are beyond when it should have been done. I do however have some major concerns. The first of which is the taking of routes for cyclist due to the upgrade to freeway status. I "firmly" believe the Dept of Roads (which should change its name to the Dept of Transportation as other states have done, should be accommodating to more than vehicle traffic. At one point in the early years of this project, a plan for a linear park for the purpose of an adjacent bike way was looked at carefully. It went to a vote and due to additional cost was not passed. However Lincoln has changed a great deal since then with an explosion of trails and trail users, I believe support is now there to find a way to fund this. As with I-180 and the additional green space to make Lincoln more attractive and then also not the need for the horrible sound reduction fencing, this would be a great add for Lincoln, and show NDOR is more than ~~than concrete~~ sorry about that. Please Please Please find a way to get a linear park into this project

February 10, 2014

Dear Mr. Arp:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding access for bicyclists have been considered by our engineering and environmental team.

Additionally, it has been noted that your preference would be a Department of Transportation versus a Department of Roads designation to better promote all modes of transportation. Your support for a linear park and attractive green space along the beltway has been documented. Your objections to noise walls has also been documented as part of our Environmental Assessment process.

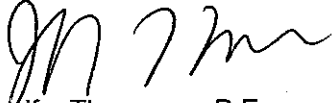

NDOR has established a website for the Lincoln South Beltway project. An informational video regarding bicycle connectivity, information from the last public meeting, as well as announcements of future meetings, is available at: [www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

Re: Public Comment in Support of Lincoln South Beltway project

Dear Director Peters,

The Lincoln Chamber of Commerce (LCoC) wishes to thank the Nebraska Department of Roads and the members of the Nebraska Highway Commission for programming the Lincoln South Beltway project for funding under the Build Nebraska Act.

The LCoC is a stalwart advocate for comprehensive infrastructure investment because we know that it serves as the foundation for economic growth and vitality for our community.

A safe, efficient, and complete transportation system is essential for Lincoln's continued healthy growth. LCoC is proud to have served as a partner with so many other community organizations over the past several years in selecting and protecting beltway corridors, supporting needed funding, and continuing to support environmental assessment and design for the Lincoln South Beltway project.

As the Lincoln community is reintroduced to the Lincoln South Beltway and other future improvements to complete a beltway system for the City of Lincoln, the LCoC will continue to work to support this major component of Lincoln's future road system.

Let's get this project going and make Lincoln's transportation system safer, more efficient, and more aligned with the needs of a growing and prosperous Lincoln.

Sincerely,

A handwritten signature in black ink that reads "Bruce J. Bohrer". The signature is fluid and cursive, written over a printed name and title.

I think the two roundabouts along  
77 on Subtillo are a little excessive.

I understand that one larger circle could  
be more expensive, but I'm sure there  
is a 3rd option that meets all needs.

I do believe this will benefit the goal of  
getting semi-trucks out of the center of town.

I think the on ramp from the south onto  
the beltway from 77 heading North works very  
well.

Maybe there is a similar option of an off ramp  
from those that could be used instead of the  
two roundabouts.

The Federal Highway Administration  
(FHWA), the Nebraska Department of  
Roads (NDOR), the City of Lincoln, and  
Lancaster County appreciate your  
input. Your comments, questions, and  
suggestions will be reviewed by

## STATE OF NEBRASKA

DEPARTMENT OF ROADS

**Randall D. Peters, P.E.**, Director - State Engineer

1500 Highway 2 • PO Box 94759 • Lincoln NE 68509-4759

Phone (402) 471-4567 • FAX (402) 479-4325 • [www.transportation.nebraska.gov](http://www.transportation.nebraska.gov)

January 7, 2014

Dear Ms. Westphal:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding the number of lanes on the South Beltway have been passed along to the engineering and environmental team. The South Beltway will be built as a four lane facility because six lanes are not currently warranted. However, our design will accommodate the possible addition of lanes in the future should traffic volumes warrant such expansion.

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

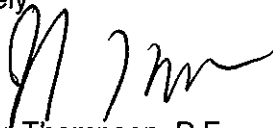

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:  
[www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

January 7, 2014

Dear Mr. Oelling:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding support for the South Beltway project have been recorded. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

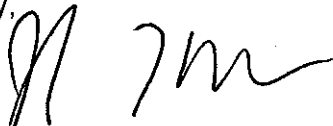

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:

Mr. Claude Jensen  
2100 S 192nd St.  
Bennet NE 68317

Dear Mr. Jensen:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding sizing of roundabouts has been passed along to our engineering and environmental team. Roundabouts are routinely designed to accommodate large and even oversize vehicles. Special attention will be paid to ensure that all vehicle types can safely and efficiently maneuver within any roundabout that becomes part of the South Beltway final design.

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

I am writing to encourage project planners to fully develop multi-modal use and access to roadways surrounding the beltway. As a bicycle commuter, I depend on Highways N-2 and US-77 for travel. The city of Lincoln is developing a protected bikeway on N Street downtown - while I don't know if an equivalent bikeway along N-2 / US-77 / South Beltway is the exact solution, I do ask that Beltway project planners take Bicycle travel and pedestrian crossings, etc. into consideration. A robust transportation corridor would serve the city & county well. Thank you!

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Our Neighborhood Association uses Old Cheney from Hwy 77 to 14<sup>th</sup> Street all the time we would like to see that Old Cheney stay open with a full access interchange. We need access to Old Cheney and their businesses.

Old Cheney is a highly traveled road - if it was closed from Hwy 77 to 14<sup>th</sup> it would over stress Pioneer which is a busy road also.

Please consider keeping both Old Cheney and Pioneer intersections open.

I guess this part of the West Beltway Project.

Please let us know.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Ms. Deb Szalawiga  
820 W Burnham  
Lincoln NE 68522

Dear Ms. Szalawiga:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding concerns about closing Old Cheney Road from US Highway 77 to 14th Street are not part of the South Beltway project. However, your concerns have been forwarded on to the design team for that project. Area residents will be provided with opportunities in the future to provide input as it relates to any changes along US Highway 77. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

**Chris,**

I'm sorry you weren't able to attend. The public meeting was an open house style planning workshop. There were no minutes. The materials handed out and displays presented are posted on the NDOR website at [www.transportation.nebraska.gov](http://www.transportation.nebraska.gov); go to the highway projects link just below the search bar and scroll down to Lincoln South Beltway. I have attached the hand-out and a sample comment sheet. I would be glad to take comments or answer questions any time.

Essentially this meeting was to re-introduce the public to the project which was shelved in 2008. As NDOR begins the process on a new environmental document and update engineering designs, we would appreciate your input. Another informational open house meeting will be held in 6-8 months to present those updates.

January 7, 2014

Dear M. Heinzle:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saitillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

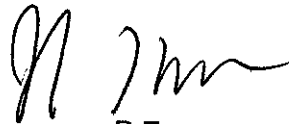

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at:  
[www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

**Subject:** Lincoln South Beltway - Impact to Bicyclists

Hi Greg,

It was nice visiting with you briefly last night about the South Beltway and its impact to the bicyclists in Lincoln. I would like to submit this PDF document, as well as this email in the public comments for the project.

I ride with a large group of bicyclists that worked together to offer some ideas and suggestions for routes allowing bicyclist easy access to Southeast Nebraska. Like you mentioned, the South Beltway looks like a "big moat" that will keep bicyclists from getting in or out of Lincoln. Not good!

I hope these ideas or something similar can be incorporated into the Beltway design. The way I see it, we actually have a great opportunity to enhance our network of trails and bicycling routes for Lincoln. All things considered, if we get this right, it can only be good for the City of Lincoln. More than just managing the vehicle traffic in and around the city, it will receive attention for its positive impact to the overall health of Lincoln.

If there's any chance to sit down and discuss in detail the design before it's finalized, I would welcome that opportunity.

Thanks...Brent Davis

# Proposed Routes for Cyclists – Lincoln South Beltway

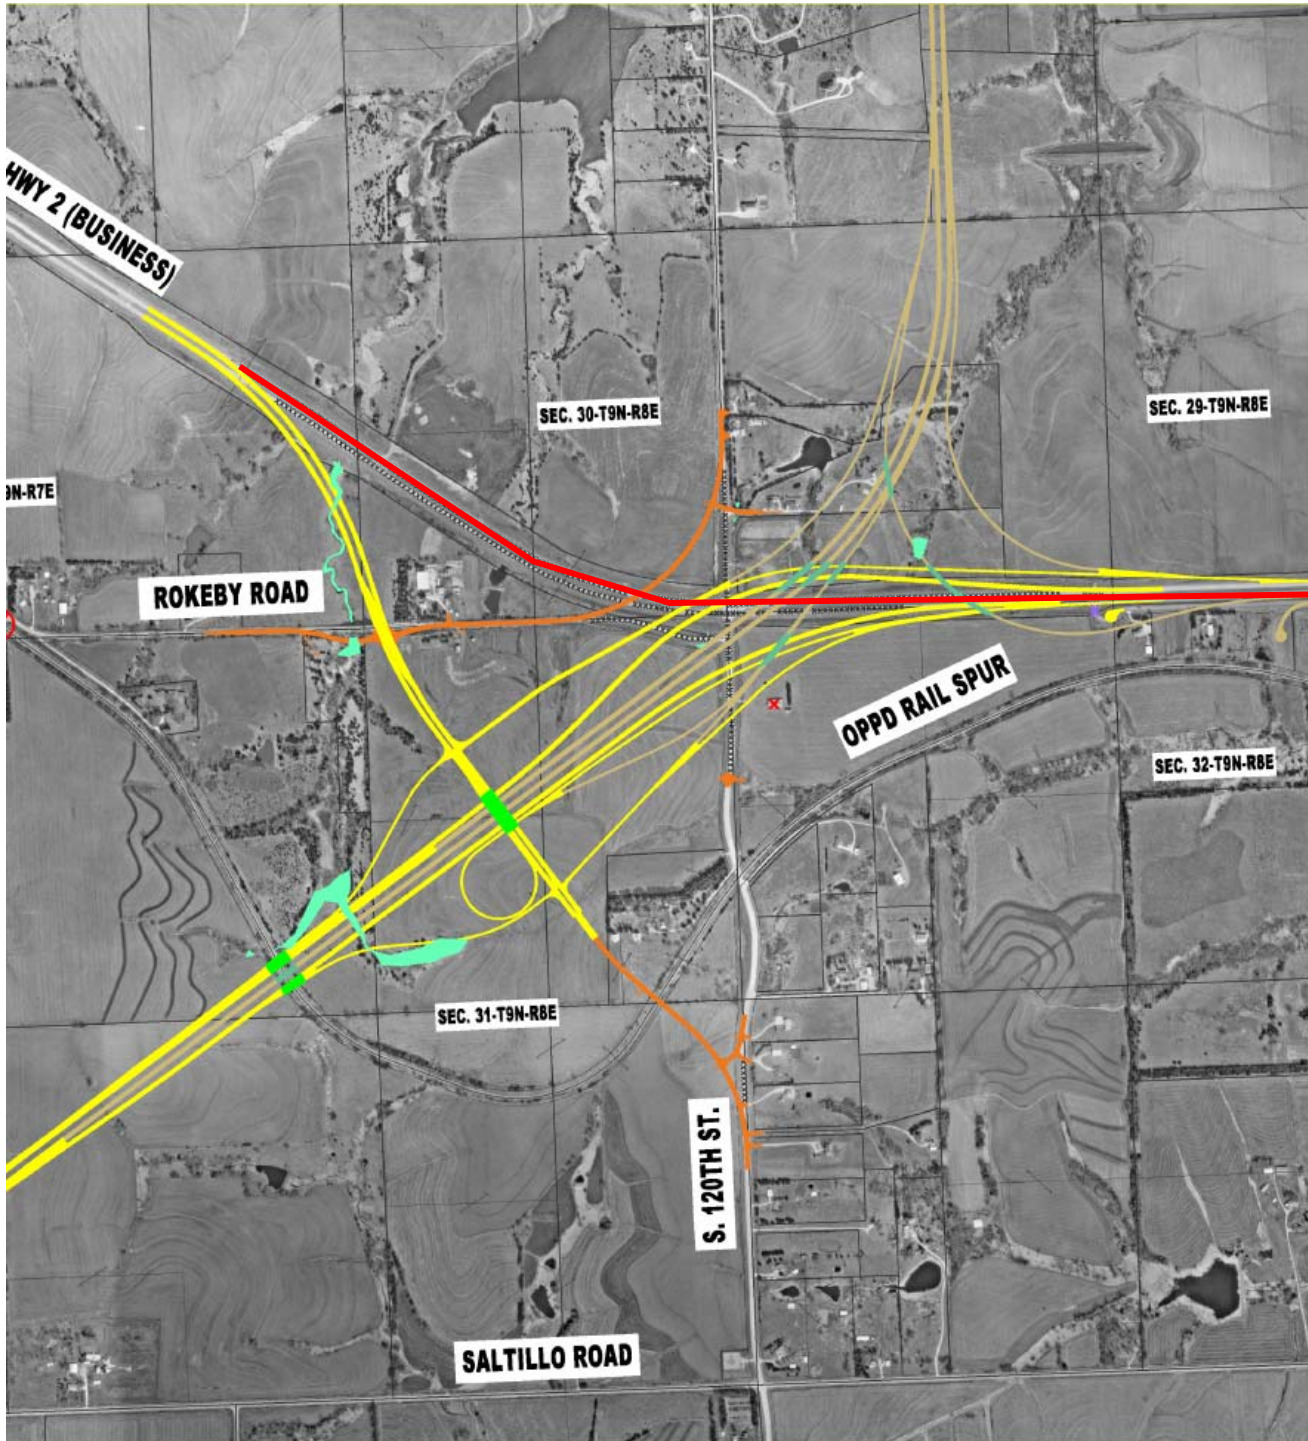

Current Proposed Routes from Planners:

- The Southwest route to get to Hwy 77. Concrete Jamaica North Trail from 14<sup>th</sup> street south to Roca Road (Hwy 55 Spur). Add shoulder along Roca Road (Hwy 55 Spur) to Hwy 77.
- The Southeast route to get to Hwy 2. Widen Old Cheney shoulder out to 134<sup>th</sup> or 148<sup>th</sup> Street.

## Proposed Southeast (Hwy 2) Lincoln Routes

Option A:

Leave one lane of the existing Hwy 2 (marked to be removed). Repurpose this old section of Hwy 2 and incorporate sections to integrate under, over, or through the beltway interchange. (Red Line)

### Proposed Southeast (Hwy 2) Lincoln Routes

#### **Option C:**

Extend paved trail, which currently ends at 91<sup>st</sup> and Hwy 2, so that it goes over/under Hwy 2 and connects to 91<sup>st</sup> in Cheney. The proposed route would require paving the following roads with adequate shoulders to allow for bicycle traffic. The paved route would be 91<sup>st</sup> to Breagan Road, then to Rokeby Road. Repurpose one of the existing lanes (marked to be removed) back to Hwy 2. With the design of these roads going over, under, or through the beltway. (Red Line)

### Proposed *Southeast (Hwy 2) Lincoln Routes*

#### Option D:

Extend paved trail, which currently ends at 91<sup>st</sup> and Hwy 2, so that it goes over/under Hwy 2 and connects to 91<sup>st</sup> in Cheney. The proposed route would require paving the following roads with adequate shoulders to allow for bicycle traffic. The paved route would be 91<sup>st</sup> to Breagan Road, to S. 98<sup>th</sup>, to Saltillo, to S. 134<sup>th</sup>, back to Hwy 2. This is taking into account these roads will go over/under the beltway.

**Proposed Southwest (Hwy 77) Lincoln Routes**

**Option A:**

Extend the Rock Island Trail to connect with the Jamaica North Trail. This would require a bridge over the railroad tracks. From this point concrete pavement for the trail heading south all the way to Roca Road (State Spur 55). Widen shoulder from Homestead Trail heading west to Hwy 77.

**Proposed Southwest (Hwy 77) Lincoln Routes**

**Option B:**

Concrete the Jamaica North/Homestead Trail from 14<sup>th</sup> street all the way to Roca Road (State Spur 55). Widen shoulder from Homestead Trail heading west to Hwy 77.

**Proposed Southwest (Hwy 77) Lincoln Routes**

**Option C:** Pave SW 14<sup>th</sup> street, just south of W. Saltillo Road to Hwy 33 and add adequate shoulders on both sides of the road to accommodate bicyclists. This assumes that bicyclists will still be able to ride down S. 14<sup>th</sup> Street and use Saltillo Road to cross Hwy 77.

Pavement Ends here and turns into gravel.

### Additional Questions or Concerns

Will the current gravel road of S 25<sup>th</sup> Street still go through or not? This gravel road is used by off road cyclists, so it's desired that this connection continue to exist once the beltway is completed. If necessary, could access from the Homestead be an option?

In 2013, I just about died in a car-semi-truck trailer collision on Hwy 2 and 14<sup>th</sup> street. To me, there is no better use of tax payer money than the Lincoln South Beltway project. It will save lives!

My biggest complaint is the time it will take to complete the project.

My biggest appreciation is for Senator Deb Fischer and her foresight to lead the charge in passing legislation for a funding mechanism.

To all involved, let's get it done!

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Hi Gene,

Thanks for your note.

I sent it to our Communication Division Manager, Mary Jo Oie, and our Public Involvement Coordinator, Greg Weinert. They will be able to answer your question about a transcript of the Lincoln South Beltway Meeting on June 25.

In the meantime, there are the Handouts, and the Displays from that meeting on the website for that project:

<http://www.transportation.nebraska.gov/projects/south-beltway/index.htm>

Also, on that page, you may subscribe to receive free emails whenever that page is updated.

And either Mary Jo or Greg will get back to you on your original request.

January 7, 2014

Dear Mr. Vannice:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

We received your request for a transcript of the most recent public meeting. Because this meeting was held as an open house, there was no presentation or transcript. All of the materials that were either on display or handed out are available on NDOR's website:  
<http://www.transportation.nebraska.gov/projects/south-beltway>

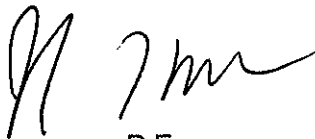

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Mr. Gene Vannice

COMMUNICATION DIVISION

To Whom it may concern:

The County, the State, or Federal, I visited with all 3. The access to my 3.5 acres or more off Sactillo is unacceptable - no entrance off Sactillo is unacceptable. I must be off required to have an access. You have told me that you need 10-32 feet of frontage of my property. A gentleman from the State said to send this paper in & we should be able to determine where we can put an access off Sactillo & determine exactly how much frontage I will lose. Will be waiting for an appointment to get this rectified.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Mr. Terry Ernisse  
1400 Saltillo Rd  
Roca NE 68430

Dear Mr. Ernisse:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

We have received your request for a meeting. One of our project engineers will be following up with you to discuss your concerns regarding access to your property. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Mr. Marvin & Mrs. Joyce Krueger  
7901 Sycamore Dr  
Lincoln NE 68506

Dear Mr. & Mrs. Krueger:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding moving the Beltway further south have been received. Through our alternative evaluation, we found that the further south any potential beltway was moved, the fewer people and vehicles would actually use it. Detailed maps with updated information will be provided at the next public meeting. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Mr. Marvin & Mrs. Joyce Krueger

My husband and I had a house built right south of Hwy. 2 in 1976. I love living in the county and I Isaac Walton League gun club is only 1/4 of a mile from us.

We don't ever have trouble getting on Hwy. 2 and we would have to drive a little farther to get where we need to go if the bypass is put in.

But my husband said if the bypass is put in he wants to move. I said no I'm not. I love it here.

And my brother lives 3 1/2 acres from us and he's in a wheel chair. He ~~has~~ has a problem driving now but it will be worse for him if the bypass is put in.

Please, I do not want it put in.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

July 2, 2013

Dear Sir:

I talked with Louis Lenzen at the South Beltway meeting on June 25<sup>th</sup>. He suggested that I send this in to remind you of the concerns my wife and I have. We live at 11980 S. 96<sup>th</sup> Street. Preliminary Nebraska Department of Roads plans for the realignment of 96<sup>th</sup> Street showed it running across the NW corner of our front yard taking out windbreak trees, bringing the road close to our house.

On November 15, 2007, we met with three NDOR representatives with our lawyer. At this meeting we were told alternative designs were being looked at and that you expected to have a new design ready sometime in the spring of 2008. Our lawyer requested that you share this new design with us. We have not received any information from NDOR.

To follow up on NDOR plans, I went to the Roads Department office on May 27, 2011, and was able to look at blueprints that showed the 96<sup>th</sup> Street realignment was moved west, staying completely off our property. Naturally our hope is that this remains true today. We request notification of any changes that would affect our property.

Sincerely,

Howard Seuferer  
11980 S. 96<sup>th</sup> Street

RE: Lincoln South Beltway East Segment – 2-6(118) – CN:12578B

Dear Mr. Seuferer,

This Letter is in response to your comments from your letter of August 2005, received as a result of the Public Hearing held on August 15<sup>th</sup>, 2007, in Lincoln Nebraska, regarding the Nebraska Department of Roads projects as noted above, and our subsequent meeting, with you and your wife, on 8-17-07 at the NDOR central complex.

In your letter you mentioned that you are concerned about the loss of your trees on the Northwest corner of your property resulting from the realigning of 96<sup>th</sup> St. As we stated at our 8-17-07 meeting, we will investigate ways to avoid or minimize impacts to the aforementioned trees. Once we have finished our investigation we will contact you to show you what we have designed.

We appreciate concerned citizens taking the time to share their valuable comments and concerns as we proceed through the design process. We will continue to work with the community as we progress with design.

If you have any further questions, you may reach me at (402)479-3893.

Sincerely,

Toby D. Fierstein, P.E.

CONCERNS Rokeby Road Efits are being cut off from highway 2 at 2 locations 50 126th & 50 134th Streets.

Comments The displayed map had no access road to highway 2 from paved Rokeby Road. As a property and home owner we originally purchased land to live on a paved surface Road. We never wished to travel on dirt, gravel, or Rock Roads. We searched for many years to find just the right spot. We request to leave the access roads open to highway 2, that the state of Nebraska provided us at 50 134th and 50 126th streets. If an alternative route is necessary, please provide us with a paved Road to highway 2.

SOLUTION To keep at least one access-efit Road open. or pave a new road to get to highway 2

COMMUNICATION DIVISION

Concern: A paved access road to Highway 2 for home & land property owners who now live on a asphalt road with (2) access exits available to Hwy 2. The proposed map shows no access to Hwy 2.

Comments: On behalf of our existing 6 family neighborhood: 12701, 12805, 13001, 13201, 13203, 10001 So. 134th St. } Rokeby Road

We who live on Rokeby Road with access to Hwy 2 at So. 126th & So. 134th Streets request to keep both exits open. We choose to live on a paved surface road not rock, gravel, or dirt. The State of Nebraska provided us with an asphalt road knowing this. The road has been very well maintained and kept up by the State of NE since the new four lanes were built. Originally our driveways all hooked up to Hwy 2 at each individual address listed (before 4 lanes). If provisions for a new route are needed; a paved surface road is required.

Solution: To keep both existing exits open or provisions for a new paved surface road be provided to this neighborhood.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

January 7, 2014

Mr. James & Mrs. Tammy Wheeler  
12701 Rokeby Rd  
Bennet NE 68137

Dear Mr. & Mrs. Wheeler:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding the South Beltway project have been recorded and passed on to the engineering and environmental team. We understand that you are concerned about impacts resulting from the removal of Rokeby Road access to N-2 at 126th and 134th Streets. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

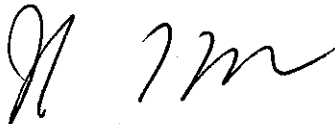

Mr. James & Mrs. Tammy Wheeler

Regarding the planned South Beltway my concerns - suggestions are as follows:

1. Keep cyclists in mind - if you build it, they will ride. Please be sure to make safe shoulders & visible corners / stoplights
2. Please - please keep from building - we need to stop the sprawl. Keep residential & industrial facilities out of the country. - esp. since you will be bisecting 16 farms for the road.

The plans make sense & there is no way I could say anything to keep it from happening - just take everyone & the big picture in mind when making a big decision. Thank you, Amber Hollmann

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Dear Ms. Hollmann:

Thank you for your interest in the Nebraska Department of Roads Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads (NDOR) and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding access for bicyclists have been considered by our engineering and environmental team. Your concerns about negative impacts related to urban sprawl and expanded development have also been communicated to the project team.

NDOR has established a website for the Lincoln South Beltway project. An informational video regarding bicycle connectivity, information from the last public meeting, as well as announcements of future meetings, is available at: [www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

COMMUNICATION DIVISION

Having two major exits (68/70th and 82/84th Streets) one mile apart will cause excessive congestion among cars entering and exiting the beltway as well as posing a serious accident hazard. The area would be better served by combining the two exits into one exit or by moving an exit to 96th Street.

The state needs to reimburse the county to pave the unpaved 3 miles of 82nd Street south of the beltway as the exits will significantly increase traffic on this gravel road.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Ms. Sherrill Echterkamp  
12600 S 82nd St  
Roca NE 68430

Dear Ms. Echterkamp:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments regarding the South Beltway project have been recorded and passed on to the engineering and environmental team. We understand that you are concerned about access locations at 68th/70th Streets and 82nd/84th Streets. We understand that it is your preference to combine those access points into one at 96th Street and provide additional paving of 82nd Street. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Ms. Sherrill Echternkamp

We have 2 requests:

① Our house was built in the late 1880's. We would like the State Historic Preservation Office to consider our property for protection as a historic property.

② Can ~~the~~ alternatives to the proposed re-routing of 96th St. be considered? ~~Can it~~ Instead of re-routing, can a bridge be built so that goes over (or under) the beltway? If not, we request that the location of the 96th tie-in to Saltillo be moved west so as not to ~~of~~ infringe on the NW corner of our property, and have it tie in where a ~~driveway~~ driveway at 9955 Saltillo Rd currently exists.

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Mr. Stuart Osterhun  
10077 Saltillo Rd  
Lincoln NE 68430

Dear Mr. Osterhun:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your request for historic property consideration will need to be redirected to the Nebraska State Historical Society. For further information on cultural resources regarding this effort, we would invite you to contact:

Ms. Jill Dolberg  
Nebraska State Historical Society  
State Historical Preservation Office  
[jill.dolberg@nebraska.gov](mailto:jill.dolberg@nebraska.gov)  
(402) 471-4773

Mr. Stuart Osterhun

January 7, 2014

Page 2

We also understand that you are concerned with the tie-in of 96th Street to the South Beltway. A bridge over the Beltway or underpass is not feasible for this location. Additionally, if the current location was shifted to the west, we would encounter issues with the bridge on Saltillo.

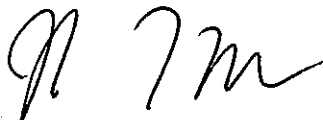

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

NDOR has established a website for the Lincoln South Beltway project. Information from the last public meeting, as well as announcements of future meetings, is available at: [www.transportation.nebraska.gov/projects/south-beltway](http://www.transportation.nebraska.gov/projects/south-beltway)

NDOR will make every reasonable accommodation to provide appropriate provisions for the hearing and visually challenged or persons with Limited English Proficiency (LEP). Mr. Charles Simonds  
12805 Rokeby Rd  
Bennet NE 68317-2061

Dear Mr. Simonds:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Mr. Charles Simonds

JUL 12  
COMMUNICATION DIVISION

We attended the open house, listed above. We live south of Hiway 2 and use Hiway 2 from 56<sup>th</sup> to 27<sup>th</sup> St. at least 4 times a day - very often more.

We would never consider turning left on Hiway 2 at either 56<sup>th</sup> or 27<sup>th</sup> St. just because the light is Green. It is too dangerous. The 18 vehicles OFTEN "run red lights." This week I watched one truck going <sup>West</sup> ~~West~~, go thru red lights on 56<sup>th</sup> and 48<sup>th</sup>.

more often than not, there are 5-10 semis at each light every 1/2 mile through the city). Taking Hiway 2 to go downtown is just plain dangerous.

I know the argument is "Wahro needs to be addressed first" Have a dozen people or more been killed going through Wahro?? I doubt it.

It doesn't take a "Traffic Count" to know 110s of "semis" use Hiway 2 through Lincoln, compared to the semis going through Wahro. Please move primarily on the South Bypass. I would like to drive Hiway 2 where I can load & unload. (I will do it in groups)

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.

Ms. Ann Sidles  
5200 Cavy Rd  
Lincoln NE 68516

Dear Ms. Sidles:

Thank you for your interest in the Nebraska Department of Roads (NDOR) Environmental Assessment for the proposed Lincoln South Beltway, located in Lancaster County at the southern edge of the City of Lincoln. The Lincoln South Beltway would relocate Nebraska Highway 2 (N-2) from approximately South 127th Street to U.S. Highway 77 along a new east-west alignment south of Saltillo Road. The South Beltway would provide a new alternative for through traffic, especially truck traffic, to travel around Lincoln.

The purpose of the Lincoln South Beltway project is to improve the function of local and regional transportation networks by reducing conflicts between trips not destined for Lincoln and local trips within the City and to improve the east-west connectivity for commuter and freight trips through the City. The Nebraska Department of Roads and Federal Highway Administration (FHWA), in cooperation with the City of Lincoln and Lancaster County, evaluated and approved this project in 2002 as part of a larger project that included both the South Beltway and an East Beltway, which together would connect with I-80 and US-77 to create a freeway loop around the City. Due to the time that has passed as well as focusing efforts on the South Beltway, NDOR and FHWA are updating previous traffic and other analyses originally used to support the needs and benefits of the project and validating the South Beltway as a stand-alone project in this Environmental Assessment.

The Environmental Assessment is in the scoping or information gathering phase. During this time, it is important that we receive comments from citizens so that we can address citizen concerns or questions in the Environmental Assessment document. There will be additional opportunities to provide input during future project phases.

Your comments supporting this project as a way to divert trucks and other heavy traffic off of current Nebraska Highway 2 have been passed along to, and are being evaluated by, our engineering and environmental team. As noted above, the purpose of this phase of the project is to receive public comments, questions, and suggestions so that they can be considered as part of the project development process. All comments received from the public during the scoping period will help shape and focus the analysis in the Environmental Assessment and will be included as part of its documentation.

Ms. Ann Sidles

Thank you for doing this project.  
 My daughter had to cross Highway 2  
 to get to pound middle school.  
 This is a ~~an~~ much needed project

The Federal Highway Administration (FHWA), the Nebraska Department of Roads (NDOR), the City of Lincoln, and Lancaster County appreciate your input. Your comments, questions, and suggestions will be reviewed by appropriate personnel. Thank-you for your participation.
